FOREWORD

"Crime in the United States" is an annual publication compiled by the FBI. The information contained in this yearly presentation is submitted by thousands of policing agencies that make up this Nation's law enforcement community.

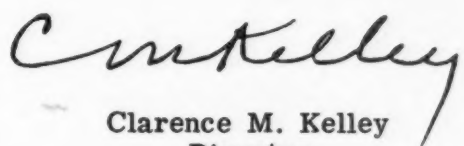
We, in the FBI, regard our role in publishing this straightforward and objective report as one of grave responsibility. Every effort is made to insure the validity and accuracy of the information presented.

I, personally, have had the honor of serving this Nation as a Chief of Police and as a Director of the FBI. Through these experiences, I have come to fully appreciate the importance of a nationwide statistical view of crime.

The Uniform Crime Reporting Program was conceived and implemented by our Nation's law enforcement agencies over 45 years ago. Two basic needs were recognized. First, it was felt the American people deserved an accounting of the extent and nature of criminal activity. Secondly, law enforcement leaders needed an administrative tool to better manage their departments. These needs were met through the cooperative effort of law enforcement in developing this Program.

When first implemented, the Uniform Crime Reporting Program was used on a relatively limited basis. Now, however, this function has become multi-faceted. Scholars rely upon this data to better understand the seriousness of crime and its effect on our society. Legislators depend upon this data for direction in developing necessary legislation to more effectively combat crime. Administrators from all levels of the criminal justice community use the information about the incidence of crime contained in this publication to plan their individual programs.

The cooperative effort at all levels of our law enforcement community is necessary in gathering the data for this publication. This has resulted in increased understanding and appreciation among all of our various agencies, large and small.



Clarence M. Kelley
Director

Crime Factors

Crime is a social problem and the concern of the entire community. The law enforcement effort is limited to factors within its control.

Uniform Crime Reports gives a nationwide view of crime based on police statistics contributed by local law enforcement agencies. The factors which cause crime are many and vary from place to place throughout the country. The reader of this publication is cautioned against comparing statistical information of individual communities solely based on a similarity in their population counts. Population is only one of many factors which must be considered in a comparative study of crime. Some of the conditions which affect the volume and type of crime that occurs from place to place are briefly outlined as follows:

Density and size of the community population and the metropolitan area of which it is a part.

Composition of the population with reference particularly to age, sex, and race.

Economic status and mores of the population.

Stability of population, including commuters, seasonal, and other transient types.

Climate, including seasonal weather conditions.

Educational, recreational, and religious characteristics.

Effective strength of the police force.

Standards of appointments to the local police force.

Policies of the prosecuting officials.

Attitudes and policies of the courts and corrections.

Relationships and attitudes of law enforcement and the community.

Administrative and investigative efficiency of law enforcement, including degree of adherence to crime reporting standards.

Organization and cooperation of adjoining and overlapping police jurisdictions.

Universities (table 77) 290–291
Suburban counties (table 78) 292–295
Rural counties (table 79) 296–297

Section 1

Summary

SUMMARY OF UNIFORM CRIME REPORTING PROGRAM

Uniform Crime Reports provides a nationwide view of crime based on the submission of police statistics by city, county, and state law enforcement agencies throughout the country. The extent of coverage as demonstrated by this publication is a tribute to the cooperative and dedicated spirit of the law enforcement community in this country.

Historical Background

The Uniform Crime Reporting Program is the outgrowth of a need for a national and uniform compilation of law enforcement statistics. A voluntary national Program of collection of crime counts was initiated in 1930 by the Committee on Uniform Crime Records of the International Association of Chiefs of Police (IACP). In that same year, the Federal Bureau of Investigation (FBI) was authorized by the Congress of the United States to serve as the national clearinghouse for statistical information on crime.

Crime reports are obtained from law enforcement agencies throughout the Nation based on uniform classifications and procedures of reporting. Information regarding crime is available to law enforcement in a variety of data spheres, e.g., offenses, arrests, prosecutions, convictions, and confinements. In an effort to provide as complete a picture of crime in the United States as possible, the Committee on Uniform Crime Records of the IACP chose to obtain data on offenses that became known to police. Greater numbers of these data were available than in any other category of reportable crime information. A meaningful overview of crime was available through examination of seven offenses which were selected because of their seriousness, frequency of occurrence, and likelihood of being reported to police. These offenses, known as the Crime Index offenses, are murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft.

To provide for uniformity nationwide in the reporting of these offenses, standardized definitions were adopted. This standardization was necessary to overcome the variations in definitions of criminal offenses in the states and localities. Reporting agencies are required to interpret local criminal acts and law violations in the context of these definitions prior to submission of their counts to the FBI. The Uniform Crime Reporting definitions of these offenses are set forth later in this section. Because of the differences among the state codes, there is no possibility in a Program such as this to distinguish between crimes by designations such as "felony" or "misdemeanor."

The Committee on Uniform Crime Records, IACP, continues to serve in an advisory capacity to the FBI in the operation of this Program. In this connection, the IACP plays an active and effective part in quality control through surveys of police records and crime reporting systems. Dr. Peter P. Lejins, Director, Institute of Criminal Justice and Criminology, University of Maryland, College Park, Maryland, continues as a consultant to the FBI in the conduct of this Program.

The National Sheriffs' Association (NSA) in June, 1966, established a Committee on Uniform Crime Records to serve in an advisory capacity to the NSA membership and the national Uniform Crime Reporting Program. This Committee actively encourages sheriffs throughout the country to fully participate in this important Program.

Committees on Uniform Crime Reporting within state law enforcement associations are active in promoting interest in the Uniform Crime Reporting Program, fostering widespread and more intelligent use of uniform crime statistics, and lending assistance to contributors when the need exists.

In recent years, the FBI has actively assisted individual states in the development of statewide programs of police statistics compatible with the national system. These state statistical programs provide the advantage of increased coverage of law enforcement agencies due to state mandatory reporting requirements. The state systems also can provide direct and frequent service to law enforcement agencies in assuring completeness and quality of information provided by them. Through coordination by the state data collection agency, information is more readily available for the use of the state. The collection and reporting machinery for the national Program also is substantially streamlined.

With the development of state Uniform Crime Reporting Programs, the FBI ceases collection of data directly from individual law enforcement agencies within the state. Completed information from these agencies is forwarded to the national Program through the state Uniform Crime Reporting collection agency. As of January 1, 1976, there were 36 states operating Uniform Crime Reporting Programs. These include Alabama, Arizona, Arkansas, California, Colorado, Delaware, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, Nebraska, Nevada, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin. Several other states are in various stages of developing their own state UCR Programs. The conditions under which these systems are developed provide for consistency and comparability in the data submitted to the national Program. They also permit regular and timely reporting of the national crime data. These conditions are:

(1) The State Program must conform to the national Uniform Crime Reports standards, definitions, and information required. This, of course, does not prohibit the state from collecting other statistical data beyond the national collection. (2) The state criminal justice agency must have a proven, effective, mandatory, statewide Program and have instituted acceptable quality control procedures. (3) Coverage within the state by a state agency must be, at least, equal to that attained by national Uniform Crime Reports. (4) The state agency must have adequate field staff assigned to conduct audits and to assist contributing agencies in record practices and crime reporting procedures. (5) The state agency must furnish to the FBI all of the detailed data regularly collected by the FBI in the form of duplicate returns, computer printouts, and/or magnetic tape. (6) The state must have the proven capability (tested over a period of time) to supply all the statistical data required to the FBI in time to meet national Uniform Crime Reports publication deadlines. (7) The FBI will continue its internal procedures of editing and reviewing individual agency reports for both completeness and quality. (8) The FBI will continue to have direct contact with individual contributors within the state where necessary in connection with crime reporting matters, but will coordinate such contacts with the state agency. (9) Upon request, the FBI will continue its training programs within the state with respect to police records and crime reporting procedures. For mutual benefit these will be coordinated with the state agency. (10) Should circumstances develop whereby the state agency cannot provide the data required by the national Program, the FBI will reinstitute a direct collection of Uniform Crime Reports from law enforcement agencies within the state.

Objectives of Uniform Crime Reporting

The fundamental objective of the Uniform Crime Reporting Program is to produce a reliable set of criminal statistics on a national basis for use in law enforcement administration, operation, and management. This compiled data is also intended for the use and information of other professionals and scholars who have an interest in the crime problem. At the same time, this information is important as a reference source for the public as an indicator of the crime factor in our society.

The means utilized to attain these objectives are:

(1) To measure the extent, fluctuation, distribution, and nature of serious crime in the United States through presentation of data on the seven Crime Index Offenses.

(2) To measure the total volume of serious crime known to police.

(3) To show the activity and coverage of law enforcement agencies through arrest counts and police employee strength data.

Reporting Procedures

In the national Uniform Crime Reporting Program, contributing law enforcement agencies are

wholly responsbile for compiling their own crime reports and submitting them to the FBI. The FBI, in an effort to maintain quality and uniformity in the data received, furnishes to the contributing agencies, upon their request, training in Uniform Crime Reporting procedures. All contributors, also, are furnished with the Uniform Crime Reporting Handbook which outlines, in detail, procedures for scoring and classifying offenses. The Handbook illustrates and discusses the monthly and annual reporting forms as well as the numerous tally forms made available to facilitate the periodic tabulation of desired data.

The publication of the Uniform Crime Reporting "Newsletter," which was initiated in October, 1963, has continued with issues published when pertinent. This "Newsletter" is utilized to explain revisions in the Program as well as to present information and instructional material to assist contributors.

A centralized record system is necessary to the sound operation of any law enforcement agency. The record system is an essential basis for crime reporting by the agency. The FBI makes available upon request to any law enforcement agency the Manual of Police Records, which can serve as a guide in the establishment or modification of a basic, nonautomated police record system. Special Agents of the FBI are utilized to encourage new Uniform Crime Reporting contributors and to assist them in the established reporting procedures of Uniform Crime Reporting.

On a monthly basis, law enforcement agencies (police, sheriffs, and state police) report the number of offenses that became known to them during the month in the following crime categories: murder and nonnegligent manslaughter, manslaughter by negligence, forcible rape, robbery, assault, burglary, larceny-theft, and motor vehicle theft. This count is taken from a record of all complaints of crime received by the law enforcement agency from victims, other sources, and/or discovered by officers. Whenever complaints of crime are determined through investigation to be unfounded or false, they are eliminated from the actual count. The number of "actual offenses known" in these crime categories is reported to the FBI whether or not anyone is arrested for the crime; the stolen property is recovered; prosecution is undertaken; or any other restrictive consideration is in effect. Law enforcement agencies, on a monthly basis, report the total number of these reported crimes which they clear either by arrest or exceptional means. A separate count of crimes cleared which involve only persons under the age of 18 is shown. The number of law enforcement officers killed and assaulted and the value of property stolen and recovered during the month are also reported.

Arrests are reported monthly for all criminal acts, except traffic violations, by crime category and include the age, sex, and race of each person arrested. A report is also submitted on an annual basis concerning the number of persons formally charged by crime classification and the disposition of such charges.

The number of law enforcement officers assaulted by type of duty assignment, type of weapon used, the circumstances of the assault, and whether the victim officer sustained injury is collected monthly.

Law enforcement employee data specifically encompass the number of full-time sworn officers and other personnel. This information is collected as of October 31 of each calendar year.

State Uniform Crime Reporting Programs are encouraged to maintain the same method and scope of data for a reasonable period before expanding their efforts.

Reporting Area

During calendar year 1975, crime reports were received from law enforcement agencies representing 97 percent of the United States population living in the standard metropolitan statistical areas, 93 percent of the population in other cities, and 83 percent of the rural population. The combined coverage accounts for 95 percent of the total national population.

Presentation of crime data by areas, as used in this publication, follows as closely as practical the definitions used by the Office of Management and Budget and the Bureau of the Census for standard metropolitan statistical areas and other cities. There is, however, some deviation insofar as the rural area is concerned. For crime reporting purposes rural is generally the unincorporated portion of a county outside of standard metropolitan statistical areas. In addition, statistics are presented in certain tables relative to "suburban" areas. A suburban area consists of cities with population less than 50,000 together with counties which are within a standard metropolitan statistical area. In this use of suburban, the major core city is, of course, excluded. The suburban area concept is used because of the particular crime

conditions which exist in these communities surrounding the major core cities.

A standard metropolitan statistical area is generally made up of a core city with a population of 50,000 or more inhabitants and the surrounding county or counties which share certain metropolitan characteristics. In New England, "town" instead of "county" is used to describe standard metropolitan statistical areas. These towns do not coincide generally with established reporting units; therefore, metropolitan state economic areas in New England are used in these areas' tabulations since they encompass an entire county or counties. Standard metropolitan statistical areas, as used in this publication, make up approximately 73 percent of the total United States population.

"Other cities" are urban places outside standard metropolitan statistical areas. Most of these places are incorporated and comprise 11 percent of the 1975 population. Rural areas are made up of the unincorporated portions of counties outside of urban places and standard metropolitan statistical areas and represent 16 percent of our national population. Throughout this Program, sheriffs, county police, and many state police report on crimes committed within the limits of the counties but outside cities while local police report on crime committed within the city limits (urban places).

Editing Procedures

Uniformity of crime data collected under this Program is of primary concern to the FBI as the national clearinghouse. With the receipt of reports from over 13,000 contributors, the problems of attaining uniformity are readily apparent. Issuance of instructions does not complete the role of the FBI. On the contrary, it is standard operating procedure to examine each incoming report not only for arithmetical accuracy but also, and possibly of even more importance, for reasonableness as a possible indication of error.

Variations in the level and ratios among the crime classes established by previous reports of each agency may be used as a measure of possible or probable incompleteness or changes in reporting procedures. Necessary arithmetic adjustments or unusual variations are brought to the attention of the submitting agency by correspondence. During 1975, communications were addressed to contributors primarily as a result of editing and evaluation processes. Correspondence with contributors and state Uniform Crime Reporting Programs is the principal tool for supervision of quality. Not only are individual reports studied, but also periodic trends for individual reporting units are prepared. Crime rates for all units are grouped for general comparability to assist in detecting variations and fluctuations possibly due to some reason other than chance. For the most part, the problem is one of keeping the contributors aware of the type of information necessary for the success of this Program.

The effort to eliminate duplication in crime reporting by the various agencies is given constant attention. In addition to detailed instructions as to the limits of reporting jurisdictions between sheriffs and police in urban places, lists of urban places by county are furnished to sheriffs, county police, and in some instances state police organizations upon request.

The FBI schedules Uniform Crime Reporting seminars and workshops throughout the country for law enforcement personnel. Contacts by Special Agents of the FBI are utilized to enlist the cooperation of new contributors and to explain the purpose of this Program and the methods of assembling information for reporting. When correspondence, including specially designed questionnaires, does not elicit a response, Special Agents may be directed to visit the contributor to satisfactorily resolve the misunderstanding.

Variations from the desired reporting standard which cannot be resolved by the steps indicated above are brought to the attention of the Committee on Uniform Crime Records of the IACP. The Committee may designate a representative to make a personal visit to the agency to cooperatively assist in a needed revision of records and reporting methods.

Regardless of the extent of the statistical editing processes used by the FBI, the accuracy of the data assembled under this Program depends upon the sincere effort exerted by each contributor to meet the necessary standards of reporting. For this reason, the FBI is not in a position to vouch for the validity of individual agency reports.

The Crime Totals

Communities not represented by crime reports are relatively few. An examination of the tables found in this document show 1975 crime totals for the Index classifications and the extent of coverage of the data for a particular table. The FBI

conducts a continuing Program to further reduce the unreported areas. The continuing development and implementation of mandatory state Uniform Crime Reporting Programs will virtually eliminate unreported areas.

Within each of the three areas—standard metropolitan statistical, other urban, and rural—it is assumed that the unreported portion had the same proportionate crime experience as that for which reports were received. Estimates for unreported areas are based on the reported crime experience of similar areas. Certain refinements are made in this basic estimating procedure as the need arises.

Crime Trends

Crime data for trends are homogeneous to the extent that figures from similar reporting units, on the basis of population, are used for each of the periods tabulated. In all trend tabulations, only those reporting units are used which have provided comparable data for the period under consideration. National, geographic, and area trends are always established on the basis of two consecutive years. Exclusions from trend computations are made when figures from a reporting unit are obviously inaccurate for any period or when it is ascertained that unusual fluctuations are due to such variables as improved records procedures.

As a matter of standard procedure, crime trends for individual places are analyzed five times a year by the FBI. Any significant increase or decrease is made the subject of a special inquiry with the contributing agency. In 1975, for example, approximately 4,000 contributing agencies were contacted inquiring as to the reason for significant increases or decreases in pertinent crime classifications. The communication containing this inquiry specifically directs attention to possible changes in records or reporting procedures. When it is found that crime reporting procedures are in part responsible for the difference in the level of crime, the figures for specific crime categories or totals are excluded from the trend tabulations. Year-to-year trends in Uniform Crime Reports are valid and may be used to reasonably establish long-term trends as well as to reestimate crime volume and reconstruct crime trends for prior years. It can be assumed, logically, that the current year is the most complete in terms of volume. Trend or percent change as established by comparable units for each two-year period is then applied as the basis for reestimating the volume of crime for prior years.

On the other hand, crime rate tables by state and standard metropolitan statistical area contain the most reliable reports available for the current year, and care should be exercised in any direct comparisons with prior issues. Changes in crime level may have been due in part to improved reporting or records procedures rather than to chance.

Population Data

In computing crime rates by state, geographic division, standard metropolitan statistical area, and the Nation, population estimates released by the Bureau of the Census on July 1, 1975, were used. Population estimates for individual cities and counties were prepared using special census reports, state sources and estimates, commercial sources, and extrapolation where no other estimate was available. Complete 1975 population estimates for individual cities and counties were used from 22 states while official sources in other states provided limited data which was used selectively. The estimated United States population increase in 1975 was 1 percent over 1974 according to the figures published by the Bureau of the Census.

Recent Developments in Uniform Crime Reporting

The Uniform Crime Reporting Committee of the National Sheriffs' Association and the Uniform Crime Records Committee of the IACP jointly adopted a revised collection format for Stolen Property by Type and Value. The breakdown format is: (A) Currency, Notes, Etc.; (B) Jewelry and Precious Metals; (C) Clothing and Furs; (D) Locally Stolen Motor Vehicles; (E) Office Equipment; (F) Televisions, Radios, Stereos, Etc.; (G) Firearms; (H) Household Goods; (I) Consumable Goods; (J) Livestock; (K) Miscellaneous. The change took effect January 1, 1975.

The second national State Uniform Crime Reporting Program Conference was held on June 28–July 1, 1976, at the FBI Academy at Quantico, Virginia. Invited to the Conference were representatives from all State Uniform Crime Reporting Programs, as well as the Committee on Uniform Crime Records of the IACP and the Uniform Crime Reporting Committee of the National Sheriffs' Association. Regional Directors of the Law Enforcement Assistance Administration and representatives of IACP Headquarters were in attendance.

Offenses in Uniform Crime Reporting

Offenses in Uniform Crime Reporting are divided into two groupings designated as Part I and Part II offenses. Crime Index offenses are included among the Part I offenses. Offense and arrest information is reported for the Part I offenses on a monthly basis, whereas only arrest information is reported for Part II offenses.

The Part I offenses are as follows:

1. **Criminal homicide.**—(a) Murder and nonnegligent manslaughter: All willful felonious homicides as distinguished from deaths caused by negligence. Excludes attempts to kill, assaults to kill, suicides, accidental deaths, or justifiable homicides. Justifiable homicides are limited to: (1) The killing of a person by a law enforcement officer in line of duty; and (2) The killing of a person in the act of committing a felony by a private citizen. (b) Manslaughter by negligence: Any death which the police investigation established was primarily attributable to gross negligence of some individual other than the victim.

2. **Forcible rape.**—The carnal knowledge of a female, forcibly and against her will in the categories of rape by force, assault to rape, and attempted rape. Excludes statutory offenses (no force used—victim under age of consent).

3. **Robbery.**—Stealing or taking anything of value from the care, custody, or control of a person by force or by violence or by putting in fear, such as strong-arm robbery, stickups, armed robbery, assaults to rob, and attempts to rob.

4. **Aggravated assault.**—Assault with intent to kill or for the purpose of inflicting severe bodily injury by shooting, cutting, stabbing, maiming, poisoning, scalding, or by the use of acids, explosives, or other means. Excludes simple assaults.

5. **Burglary—breaking or entering.**—Burglary, housebreaking, safecracking, or any breaking or unlawful entry of a structure with the intent to commit a felony or a theft. Includes attempted forcible entry.

6. **Larceny-theft** (except motor vehicle theft).—The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. Thefts of bicycles, automobile accessories, shoplifting, pocket-picking, or any stealing of property or article which is not taken by force and violence or by fraud. Excludes embezzlement, "con" games, forgery, worthless checks, etc.

7. **Motor vehicle theft.**—Unlawful taking or stealing or attempted theft of a motor vehicle. A motor vehicle is a self-propelled vehicle that travels on the surface but not on rails. Specifically excluded from this category are motor boats, construction equipment, airplanes, and farming equipment.

The Part II offenses are:

8. **Other assaults (simple).**—Assaults which are not of an aggravated nature.

9. **Arson.**—Willful or malicious burning with or without intent to defraud. Includes attempts.

10. **Forgery and counterfeiting.**—Making, altering, uttering or possessing, with intent to defraud, anything false which is made to appear true. Includes attempts.

11. **Fraud.**—Fraudulent conversion and obtaining money or property by false pretenses. Includes bad checks except forgeries and counterfeiting. Also includes larceny by bailee.

12. **Embezzlement.**—Misappropriation or misapplication of money or property entrusted to one's care, custody, or control.

13. **Stolen property; buying, receiving, possessing.**—Buying, receiving, and possessing stolen property and attempts.

14. **Vandalism.**—Willful or malicious destruction, injury, disfigurement, or defacement of property without consent of the owner or person having custody or control.

15. **Weapons; carrying, possessing, etc.**—All violations of regulations or statutes controlling the carrying, using, possessing, furnishing, and manufacturing of deadly weapons or silencers. Includes attempts.

16. **Prostitution and commercialized vice.**—Sex offenses of a commercialized nature and attempts, such as prostitution, keeping a bawdy house, procuring or transporting women for immoral purposes.

17. **Sex offenses (except forcible rape, prostitution, and commercialized vice).**—Statutory rape, offenses against chastity, common decency, morals, and the like. Includes attempts.

18. **Narcotic drug laws.**—Offenses relating to narcotic drugs, such as unlawful possession, sale, use, growing and manufacturing of narcotic drugs.

19. **Gambling.**—Promoting, permitting, or engaging in illegal gambling.

20. **Offenses against the family and children.**—Nonsupport, neglect, desertion, or abuse of family and children.

21. **Driving under the influence.**—Driving or operating any motor vehicle or common carrier

while drunk or under the influence of liquor or narcotics.

22. **Liquor laws.**—State or local liquor law violations, except "drunkenness" (class 23) and "driving under the influence" (class 21). Excludes Federal violations.

23. **Drunkenness.**—Drunkenness or intoxication.

24. **Disorderly conduct.**—Breach of the peace.

25. **Vagrancy.**—Vagabondage, begging, loitering, etc.

26. **All other offenses.**—All violations of state or local laws, except classes 1–25 and traffic.

27. **Suspicion.**—Arrests for no specific offense and released without formal charges being placed.

28. **Curfew and loitering laws (juveniles).**—Offenses relating to violation of local curfew or loitering ordinances where such laws exist.

29. **Runaway (juveniles).**—Limited to juveniles taken into protective custody under provisions of local statutes as runaways.

Law Enforcement Code of Ethics

As a Law Enforcement Officer, *my fundamental duty is to serve mankind; to safeguard lives and property; to protect the innocent against deception, the weak against oppression or intimidation, and the peaceful against violence or disorder; and to respect the Constitutional rights of all men to liberty, equality and justice.*

I will *keep my private life unsullied as an example to all; maintain courageous calm in the face of danger, scorn, or ridicule; develop self-restraint; and be constantly mindful of the welfare of others. Honest in thought and deed in both my personal and official life, I will be exemplary in obeying the laws of the land and the regulations of my department. Whatever I see or hear of a confidential nature or that is confided to me in my official capacity will be kept ever secret unless revelation is necessary in the performance of my duty.*

I will *never act officiously or permit personal feelings, prejudices, animosities or friendships to influence my decisions. With no compromise for crime and with relentless prosecution of criminals, I will enforce the law courteously and appropriately without fear or favor, malice or ill will, never employing unnecessary force or violence and never accepting gratuities.*

I recognize *the badge of my office as a symbol of public faith, and I accept it as a public trust to be held so long as I am true to the ethics of the police service. I will constantly strive to achieve these objectives and ideals, dedicating myself before God to my chosen profession . . . law enforcement.*

CHART 1

The crime clocks should be viewed with care. Being the most aggregate representation of UCR data, they are designed to convey the annual reported crime experience by showing the relative frequency of occurrence of the Index Offenses. This mode of display should not be taken to imply a regularity in the commission of the Part I Offenses; rather, it represents the annual ratio of crime to fixed time intervals.

Section 2

Crime and Offender

CRIME INDEX TOTALS

The offenses of murder, forcible rape, robbery, aggravated assault, burglary, larceny-theft, and motor vehicle theft are used to establish an Index in the Uniform Crime Reporting Program, to measure the trend and distribution of crime in the United States. These crimes are counted by law enforcement agencies as they become known and are reported on a monthly basis. The Crime Index offenses were selected as a measuring device because, as a group, they represent the most common local crime problem. They are all serious crimes, either by their very nature or due to the volume in which they occur. The offenses of murder, forcible rape, aggravated assault, and robbery make up the violent crime category. The offenses of burglary, larceny-theft, and motor vehicle theft make up the property crime category.

Law enforcement does not purport to know the total volume of crime, because of the many criminal actions which are not reported to official sources. Estimates as to the level of unreported crime can be developed through costly victim surveys, but this does not eliminate the reluctance of the victim to report all criminal actions to law enforcement agencies. In light of this situation, the best source for obtaining usable crime counts is the next logical universe, which is the offenses known to the police. The crimes used in the Crime Index are those considered to be most consistently reported and provide the capability to compute meaningful crime trends and crime rates.

The Crime Index presented in this publication is based on actual offenses established by police investigations. When a law enforcement agency receives a complaint of a criminal matter and the subsequent investigation discloses no offense had occurred nor was attempted, the complaint is "unfounded." Based on a stratified random sample of all reporting agencies, a recent national survey revealed that police investigations unfounded 4 percent of all complaints concerning Crime Index offenses. Violent and property unfounded offenses represented 8 percent and 4 percent respectively ranging from 3 percent in the larceny-theft classification to 15 percent in the forcible rape classification. These unfounded complaints are removed from the Crime Index counts. The unfounded percentages are valuable in estimating police activity.

During calendar year 1975, an estimated 11,256,600 Crime Index offenses were reported to law enforcement agencies. There was a 10 percent increase in estimated volume of Index offenses, 1975 over 1974. The violent crime category made up 9 percent of the Crime Index total and increased 5 percent in volume over 1974. Murder decreased 1 percent, while forcible rape increased 1 percent, aggravated assault 6 percent, and robbery 5 percent. The voluminous property crimes as a group increased 10 percent. Larceny-theft increased 14 percent, burglary was up 7 percent, and motor vehicle theft was up 2 percent.

Since 1970, the Crime Index offenses as a group have increased 39 percent. The property crimes and violent crimes, each as groups, rose 39 percent in volume during this five-year period. The increases during this five-year period ranged from 8 percent for motor vehicle theft to 48 percent for forcible rape.

The estimated 1975 crime figures for the United States are set forth in the following table titled, "National Crime, Rate, and Percent Change."

A study of the volume of crime, as measured by the Crime Index, reveals the large core cities having population in excess of 250,000 recorded a 7 percent increase while the suburban areas recorded a 10 percent increase over 1974. The rural areas of the United States registered an 8 percent increase. The cities over 1,000,000 population reported an increase of 6 percent from the previous year.

National Crime, Rate, and Percent Change

Crime index offenses	Estimated crime 1975		Percent change over 1974		Percent change over 1970		Percent change over 1960	
	Number	Rate per 100,000 inhabitants	Number	Rate	Number	Rate	Number	Rate
Total	11,256,600	5,281.7	+9.8	+8.9	+39.0	+32.6	+232.6	+179.9
Violent	1,026,280	481.5	+5.3	+4.4	+38.9	+32.5	+255.8	+190.3
Property	10,230,300	4,800.2	+10.3	+9.4	+39.0	+32.6	+230.5	+178.1
Murder	20,510	9.6	−1.0	−2.0	+28.2	+21.5	+125.1	+88.2
Forcible rape	56,090	26.3	+1.3	+.4	+47.6	+40.6	+226.3	+174.0
Robbery	464,970	218.2	+5.1	+4.3	+32.9	+26.8	+331.2	+263.1
Aggravated assault	484,710	227.4	+6.2	+5.4	+44.7	+38.0	+214.1	+164.1
Burglary	3,252,100	1,525.9	+7.0	+6.1	+47.5	+40.6	+256.6	+200.0
Larceny-theft	5,977,700	2,804.8	+13.6	+12.7	+41.5	+34.9	+222.2	+171.1
Motor vehicle theft	1,000,500	469.4	+2.4	+1.6	+7.8	+2.8	+204.8	+156.5

Regionally, in 1975, the Northeastern States reported an 11 percent increase in crime, the North Central States a 9 percent increase, the Southern States a 12 percent increase, and the Western States an increase of 7 percent.

Crime rates relate the incidence of reported crime to population. A crime rate may be viewed as a victim risk rate. Crime rates used are based on Crime Index offenses.

The Crime Index rate of the United States in 1975 was 5,282 per 100,000 inhabitants. This was a 9 percent increase from the crime rate of 4,850 per 100,000 inhabitants in 1974. The national crime rate, or the risk of being a victim of one of these crimes, has increased 33 percent since 1970. Many factors influence the nature and extent of crime in a particular community. A number of these factors are shown on page v of this publication. A crime rate takes into consideration only the numerical factor of population and does not incorporate any of the other elements which contribute to the amount of crime in a given area. Tables disclose that the varying crime experiences, especially in large cities and suburban communities, are affected by a complex set of involved factors and are not solely related to numerical population differences.

The tables set forth here reveal the variations in crime experienced by metropolitan areas, rural areas, and other cities.

The crime rates set forth in the National Crime Rate and Percent Change table for each of the Crime Index offenses show a variation from a 13 percent increase in larceny-theft to a 2 percent decrease in murder. The number of crimes per unit of population is highest in the large metropolitan centers.

Crime Rate by Region, 1975

[Rate per 100,000 inhabitants]

increased 32 percent and the property crime rate increased 33 percent. The violent crime group includes murder, forcible rape, robbery, and aggravated assault offenses. The property crime category is made up of burglary, larceny-theft, and motor vehicle theft offenses.

MURDER AND NONNEGLIGENT MANSLAUGHTER

This Crime Index offense is defined in Uniform Crime Reporting as the willful killing of another. The classification in this offense, as in all of the other Crime Index offenses, is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body.

Deaths caused by negligence, suicide, accident, or justifiable homicide are not included in the count for this offense classification. Attempts to murder or assaults to murder are scored as aggravated assaults and not as murder.

Volume

In 1975, there were an estimated 20,510 murders committed in the United States. The number of murders in 1975 is approximately 2 percent of the total for violent crime and less than one-half of one percent of the total of the seven Crime Index offenses.

An analysis of murder by month in 1975 shows that December had the greatest frequency of murder as compared to any other month of the year.

A geographical breakdown of murder by region showed 42 percent of the murders occurred in the Southern States, 23 percent in the North Central States, 18 percent in the Northeastern States, and 17 percent in the Western States.

Trend

The number of murders decreased 1 percent in 1975 from 1974. The trend in this crime classification reveals an increase from 16,000 in 1970 to 20,510 in 1975. This is an increase of 28 percent.

Regionally, the number of murder offenses in 1975 increased 10 percent in the Western States and 2 percent in the Northeastern States. The number of murders decreased 5 percent in the North Central States and 4 percent in the Southern States.

An analysis, by population grouping, of murder shows that large core cities of 250,000 or more inhabitants had a 2 percent decrease in the number of murders in 1975, the suburban areas experienced a decrease of two-tenths of one percent, and the rural areas had a 4 percent increase.

Murder Rate

In 1975, there were 9.6 victims of murder for every 100,000 inhabitants in the Nation. This was a decrease of 2 percent from the murder rate of 9.8 per 100,000 inhabitants recorded in 1974.

By population grouping, the metropolitan areas reported a murder rate of 11 victims per 100,000 inhabitants, the rural areas a rate of 8 per 100,000 inhabitants, and cities outside metropolitan areas reported a murder rate of 6 per 100,000 inhabitants.

The number of murder victims in proportion to population was highest in the Southern States with 12.7 murders per 100,000 inhabitants. This is a decrease of 5 percent from the murder rate of that Region in 1974. In 1975, the North Central States showed a murder rate of 8.1, a decrease of 5 percent from the rate in 1974 for that Region. The Western States had a rate of 9.0, which was an 8 percent increase over the 1974 rate for those states. The Northeastern States had a rate of 7.6, an increase of 3 percent in comparison to the 1974 rate.

Nature of Murder

The law enforcement agencies which participate in Uniform Crime Reporting cooperate in providing additional information regarding homicide so that a more indepth analysis of this offense can be made. Through a supplemental reporting system information is provided regarding the age, sex, and race of the victim; the weapon used in the murder; and the circumstances surrounding the offense.

The victims of murder in 1975 were male in approximately three out of four instances. This ratio of male to female victims is similar to the experience in the last several years. Approximately 51 out of 100 murder victims were white, 47 were Negro, and 2 percent other races. Three of every ten murder victims were 20 through 29 years of age.

In 1975, firearms again predominated as the weapon most often used in homicide in the Nation. The accompanying chart illustrates a breakdown by type of weapon used in the commission of murder in the Nation. Firearms were used more frequently in the Southern States than in any other region with firearms used in more than seven of every ten murders. Nationwide, 66 percent of

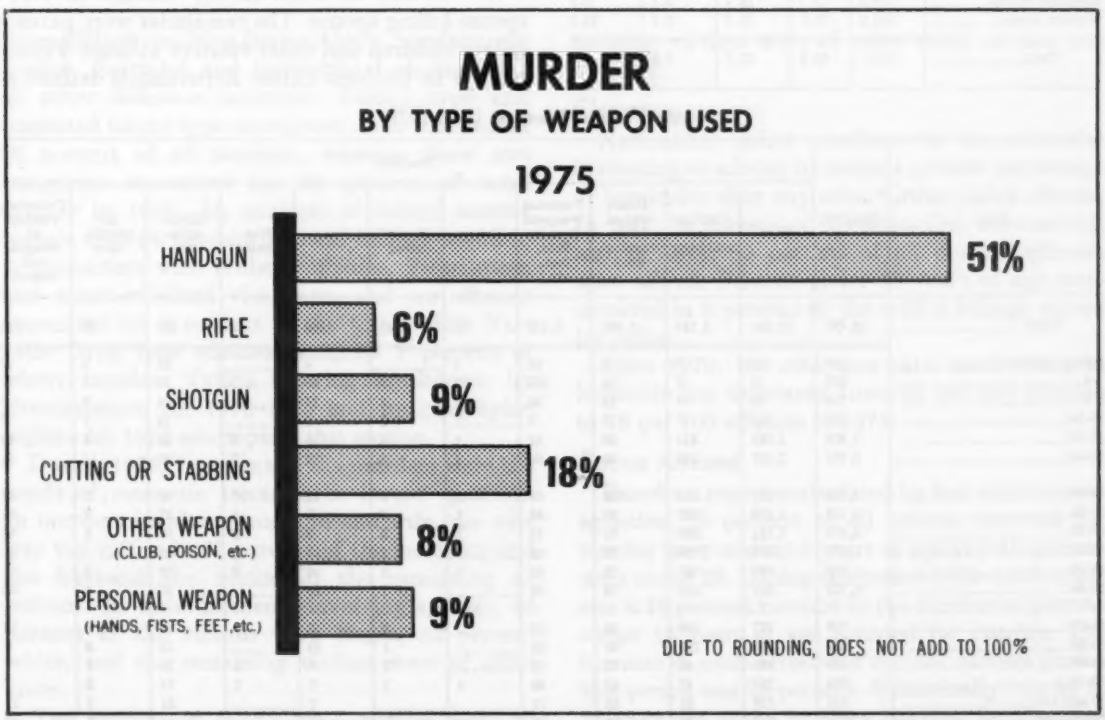

CHART 6

the homicides were committed through the use of firearms and 51 percent were committed with handguns. In 1974, 54 percent of the murders were through the use of handguns.

Cutting or stabbing weapons were used in 18 percent of the murders in the Nation. The Northeastern States reported the greatest use of knives or cutting instruments with three out of every ten murders being committed with this type of weapon. The North Central and Southern States had the least incidence of use of this type of weapon with less than two out of every ten murders. Personal weapons such as hands, fists, feet, etc. were used in 9 percent of the homicides and the remaining murders were the result of other weapons (blunt objects, poisons, explosives, arson, drowning, etc.).

Murder, Type of Weapon Used, 1975

[Percent distribution]

Region	Total all weapons used	Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons

1973	19,640	100.0	67.0	17.8	6.6	8.6
1974	20,710	100.0	67.9	17.6	6.8	7.7
1975	20,510	100.0	65.8	17.7	7.5	9.0

A comparative study for the past six years shows an increase from 65 percent of all homicides through use of firearms in 1970 to 66 percent of all homicides in 1975. A comparative analysis of weapons used to commit murder for 1970 through 1975 is shown in tabular form.

The circumstances which result in murder vary from family arguments to felonious activities. Criminal homicide is largely a societal problem which is beyond the control of police. The circumstances of murder serve to emphasize this point. In 1975, murder within the family made up approximately one-fourth of all murder offenses. Over one-half of these family killings involved spouse killing spouse. The remainder were parents killing children and other relative killings. Felony murder in Uniform Crime Reporting is defined as

Murder Victims—Weapons Used, 1975

Southern States	100.0	14.2	2.6	9.7	9.6	30.3	17.5	7.1
Western States	100.0	10.3	3.6	5.8	4.5	36.0	24.3	15.5
Total	100.0	11.5	3.0	7.9	7.3	37.9	23.0	9.4

those killings resulting from robbery, burglary, sex motive, gangland and institutional slaying, and all other felonious activities. Felony type and suspected felony type murders in 1975 constituted 32 percent of all murders, whereas these two categories accounted for 29 percent of total murder in 1970. An analysis of felony murder reveals that 54 percent of these killings occurred in connection with robbery offenses. Prostitution and commercialized vice, rape, and sex offenses accounted for 8 percent of the total, while Narcotic Drug Law offenses comprise 7 percent of felony murder. Tables showing breakdown by circumstances for 1970–1975 and by geographic regions for 1975 accompany this section.

During 1975, 7 percent of the murders were the result of romantic triangles or lovers' quarrels. In murders involving husband and wife, the wife was the victim in 52 percent of the incidents and the husband the victim in the remaining 48 percent. In these incidents involving spouses, 46 percent of the victims were Negro, 52 percent white, and the remaining victims were of other races.

The victims of felony type murder were 63 percent white, 36 percent Negro, and the remaining victims were of other races or race not reported.

Clearances

Nationally, police continue to be successful in clearing or solving by arrest a greater percentage of homicides than any other Crime Index offense. In 1975, 78 percent of the homicides were solved; and in 1974, 80 percent of all murder offenses were solved. Persons under 18 years of age were involved in 5 percent of the willful killings solved by police.

Since 1970, the clearance rate, nationwide, in homicide has decreased from 86 per 100 offenses to 78 per 100 offenses in 1975.

Persons Arrested

Based on reports submitted by law enforcement agencies, 10 percent of all persons arrested for murder were under 18 years of age and 45 percent were under 25. During the period 1970–1975, there was a 28 percent increase in the number of persons under 18 years of age arrested for murder. The increase in adult arrests for murder offenses during this period was 22 percent. Numerically, the 20 to 24 year age group had the heaviest involvement during 1975 with 25 percent of the total arrests

coming from within this age group. Negroes made up 54 percent of the arrests for murder in 1975 and 47 percent of the victims of homicide were also Negroes.

Persons Charged

Law enforcement agencies' reports disclose that 55 percent of all adults arrested for murder in 1975 were prosecuted during the year. Fifty-four percent of the adults prosecuted were found guilty as charged, and 14 percent were convicted on some lesser charge. The remaining won release by acquittal or dismissal of the charges against them. Of all individuals processed for murder, 9 percent were juveniles who had their cases referred to juvenile court jurisdiction.

AGGRAVATED ASSAULT

Aggravated assault is defined as an unlawful attack by one person upon another for the purpose of inflicting severe bodily injury usually accompanied by the use of a weapon or other means likely to produce death or serious bodily harm. Attempts are included since it is not necessary that an injury result when a gun, knife, or other weapon is used which could and probably would result in serious personal injury if the crime were successfully completed.

Volume

In calendar year 1975, there were an estimated 484,710 aggravated assaults in the Nation. This crime against the person made up 4 percent of the Crime Index offenses in 1975 and comprised 47 percent of the crimes of violence. Regionally, the Southern States reported 36 percent of the total count of these crimes followed by the Western States with 22 percent, and the North Central and Northeastern States, each with 21 percent. As has been the experience in previous years, the summer months recorded the highest frequencies of aggravated assault during 1975.

Trend

In 1975, the volume of aggravated assault offenses increased 6 percent over 1974 and 45 percent over 1970. Cities with over 250,000 inhabitants had an increase of about 3 percent. The suburban areas reported an increase of 7 percent and the rural areas an increase of 5 percent.

The Western States had an increase of 10 percent, the Northeastern States an increase of 8 percent, the Southern States had a 6 percent increase, and North Central States an increase of approximately 2 percent.

Aggravated Assault Rate

For each 100,000 persons in the United States during 1975, there were 227 victims of aggravated assault. The metropolitan areas had an aggravated assault rate of 255 per 100,000 inhabitants. The cities outside metropolitan areas had a victim rate of 192 per 100,000 inhabitants and the rate for rural areas was 124 per 100,000 inhabitants. The victim rate for the Nation for aggravated assault increased 5 percent over 1974 and 38 percent over 1970.

The Western States were highest with a rate of 284 per 100,000 followed by the Southern States with 254, the Northeastern States with 206, and the North Central States 177.

Nature of Aggravated Assault

In 1975, 25 percent of the serious assaults were committed with the use of a firearm. A knife or other cutting instrument was used in 24 percent of the assaults, 25 percent were committed with blunt objects or other dangerous weapons. The remaining assaults were with personal weapons such as hands, fists, and feet. A comparison of aggravated assault from 1970 to 1975 indicates that firearms as a weapon increased 48 percent; assaults with a knife or other cutting instrument rose 21 percent; assaults where blunt objects or other dangerous weapons were used increased 48 percent; and those aggravated assaults through use of personal weapons climbed 65 percent. The table which follows demonstrates the regional experience of aggravated assault in 1975 by type of weapon used.

Aggravated Assault, Type of Weapon Used, 1975

[Percent distribution]

Region	Total all weapons	Firearms	Knife or other cutting instrument	Other weapon; club, poison, etc.	Personal weapons
Northeastern States	100.0	17.6	28.6	28.4	25.4
North Central States	100.0	28.5	22.9	24.2	24.4
Southern States	100.0	29.2	23.6	21.7	25.5
Western States	100.0	22.3	19.3	27.1	31.3
Total	100.0	24.9	23.5	25.0	26.6

Clearances

Law enforcement agencies were successful in solving 64 of each 100 cases of aggravated assault in 1975. This relatively high solution rate is con-

CHART 7

sistent with high solution rates in other crimes against the person. Persons under 18 years of age were identified in 11 percent of these clearances. Due to the nature of these crimes, arrests are frequently made upon the response of patrol units. This type of patrol call is hazardous to the officers. Since 1966, 157 officers have lost their lives responding to disturbance-type calls, which frequently involve family or neighborhood arguments.

Persons Arrested

Arrests for aggravated assault in 1975 increased 38 percent over 1970. Since 1970, arrests of persons 18 years of age and over for aggravated assault have increased 35 percent and arrests of persons under 18 years of age for this offense have increased 57 percent. As a group, persons 21 years of age and over accounted for 68 percent of the arrests for aggravated assault in 1975 and those under age 21 accounted for 32 percent. Arrests of males outnumbered females by 7 to 1.

Persons Charged

Law enforcement agencies have difficulty in obtaining convictions based on the original charge in the aggravated assault category. Acquittals and dismissals continue to run high, accounting for 41 percent of the dispositions. Sixty-eight out of every 100 adults arrested for aggravated assault in 1975 were prosecuted. Twelve percent of the adults prosecuted for this offense were convicted of lesser charges. Eighteen percent of all persons processed were referred to juvenile court jurisdiction.

FORCIBLE RAPE

Forcible rape, as defined under this Program, is the carnal knowledge of a female through the use of force or the threat of force. Assaults to commit forcible rape are also included; however, statutory rape (without force) is not counted in this category. Crime counts in this offense classification are broken down by actual forcible rapes and attempted forcible rapes.

Volume

During 1975, there was an estimated total of 56,090 forcible rapes. Forcible rape continues, as in prior years, to comprise less than 1 percent of the Crime Index total. It makes up 5 percent of the volume of crimes of violence. When viewed geographically, the Southern States recorded 31 percent of the total volume while the North Central and Western States reported 25 percent. The Northeastern States reported 19 percent of the forcible rapes.

A comparison of the month-to-month variations of forcible rape in 1975 with the long-term seasonally adjusted trend followed the pattern set for many years. Chart 16 reflects the month-to-month variations of forcible rape during 1975, as well as a comparison with the prior average five-year experience.

Trend

The volume of forcible rape offenses in 1975 increased 1 percent over 1974, and 48 percent over 1970. During 1975, this crime occurred most frequently in large cities with 250,000 or more inhabitants, which accounted for 42 percent of the forcible rapes. Forcible rape decreased 1 percent in this group of cities and increased 3 percent in the suburban areas surrounding the large core cities. The rural areas registered a 2 percent decrease over 1974. Geographically, the Western States reported an increase of 5 percent, followed by the Northeastern States with an increase of 1 percent. The North Central and Southern States reported no significant difference.

Forcible Rape Rate

A crime rate, in its proper perspective, is a victim risk rate since it equates the number of crimes per unit of population. In 1975, 51 out of every 100,000 females in this country were reported rape victims. Since 1970, the forcible rape rate has increased 41 percent. In calendar year 1975, the forcible rape rate increased less than one percent over 1974.

The metropolitan areas experienced a risk rate of 61 victims per 100,000 females. Cities outside metropolitan areas experienced a risk rate of 26 per 100,000 females and the rate in the rural areas was 23 per 100,000 females. Females in the Western States were victims of forcible rape at the rate of 73 per 100,000. In the South this rate was 50 per 100,000, 47 per 100,000 in the North Central States and 41 per 100,000 in the Northeast.

Nature of Offenses

In 1975, 74 percent of all forcible rape offenses were actual rapes by force. The remainder were attempts or assaults to commit forcible rape. This offense is a violent crime against the person, and of all the Crime Index offenses, law enforcement administrators recognize that this offense is probably one of the most under-reported crimes due primarily to fear and/or embarrassment on the

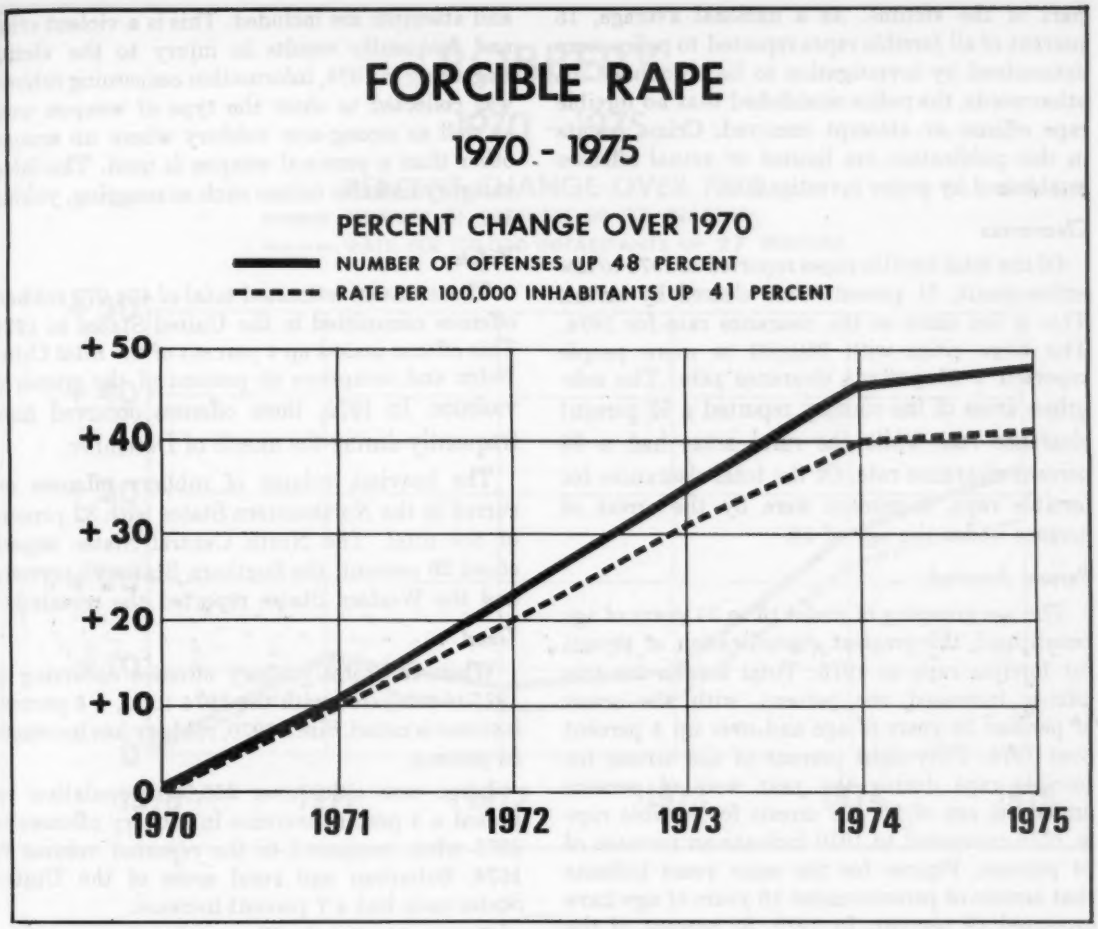

CHART 8

215-478 O - 76 - 3

part of the victims. As a national average, 15 percent of all forcible rapes reported to police were determined by investigation to be unfounded. In other words, the police established that no forcible rape offense or attempt occurred. Crime counts in this publication are limited to actual offenses established by police investigation.

Clearances

Of the total forcible rapes reported in 1975 to law enforcement, 51 percent were cleared by arrest. This is the same as the clearance rate for 1974. The large cities with 250,000 or more people reported a 51 percent clearance rate. The suburban areas of the country reported a 52 percent clearance rate while the rural areas had a 68 percent clearance rate. Of the total clearances for forcible rape, 9 percent were by the arrest of persons under the age of 18.

Persons Arrested

The age grouping of males 16 to 24 years of age constituted the greatest concentration of arrests for forcible rape in 1975. Total arrests for this offense increased one percent, with the arrest of persons 18 years of age and over up 4 percent over 1974. Fifty-eight percent of the arrests for forcible rape during the year were of persons under the age of 25. All arrests for forcible rape in 1975 compared to 1970 indicate an increase of 34 percent. Figures for the same years indicate that arrests of persons under 18 years of age have increased 19 percent. In 1975, 52 percent of the persons arrested for forcible rape were whites, 45 percent Negroes, and all other races comprised the remainder.

Persons Charged

Of all adults arrested for forcible rape in 1975, 58 percent were prosecuted for this offense. Prosecutive problems accounted for acquittals and/or dismissals in 46 percent of the cases. Forty-two percent of the adults prosecuted were found guilty of the substantive offense and 12 percent were convicted of lesser offenses. Juvenile referrals amounted to 21 percent of the persons processed on forcible rape charges in 1975.

ROBBERY

Robbery is a vicious type of crime which takes place in the presence of the victim to obtain property or a thing of value from a person by use of force or threat of force. Assault to commit robbery and attempts are included. This is a violent crime and frequently results in injury to the victim. Beginning in 1974, information concerning robbery was collected to show the type of weapon used, as well as strong-arm robbery where no weapon other than a personal weapon is used. The latter category includes crimes such as mugging, yoking, etc.

Volume

There was an estimated total of 464,970 robbery offenses committed in the United States in 1975. This offense makes up 4 percent of the total Crime Index and comprises 45 percent of the crimes of violence. In 1975, these offenses occurred most frequently during the month of December.

The heaviest volume of robbery offenses occurred in the Northeastern States with 32 percent of the total. The North Central States experienced 26 percent, the Southern States 25 percent, and the Western States reported the remainder.

Trend

When the total robbery offenses occurring in 1975 is compared with the 1974 total, a 5 percent increase is noted. Since 1970, robbery has increased 33 percent.

Large core cities over 250,000 population reported a 3 percent increase in robbery offenses in 1975 when compared to the reported volume in 1974. Suburban and rural areas of the United States each had a 7 percent increase.

Geographically, the Western States experienced a 10 percent increase in robbery offenses. The Northeastern States had an 8 percent increase. The North Central and Southern States reported 3 percent and 1 percent respectively.

The accompanying chart depicts the trend in the volume of robbery and the robbery rate, 1970–1975.

Robbery Rate

The 1975 robbery rate of 218 per 100,000 inhabitants was 4 percent above the 1974 rate. Robbery is primarily a large city crime. Seven out of ten robberies in the United States occurred in the cities with more than 100,000 inhabitants. These cities had a robbery rate of 574 victims per 100,000 people.

There were 284 robbery victims per 100,000 inhabitants in the metropolitan areas during 1975. The cities outside metropolitan areas experienced a rate of 58 victims per 100,000 people. The

CHART 9

robbery rate in the rural areas was 23 per 100,000 inhabitants.

This crime occurred most frequently in relation to population in the Northeastern States where the rate was 300 per 100,000 inhabitants. The North Central States had a rate of 207, the Western States 216, and the Southern States 169 per 100,000 people.

Nature of Robbery

Supplemental robbery information is obtained from law enforcement agencies as a part of the monthly collection of statistical data under this Program. In 1975, these figures disclosed that over half of the robberies were committed in the street. Nationally, bank robbery offenses increased from 3,517 offenses in 1974 to 4,180 in 1975. The average bank robbery dollar loss increased from 3,598 in 1974 to 4,373 in 1975.

The 1970–1975 trends in robbery by type, as illustrated by the following charts, show bank robbery has increased 79 percent. During this same period, gas or service station holdups have increased 7 percent; chain store robberies increased 112 percent; street robberies 22 percent; robberies in residences 36 percent; and holdups of other commercial or business establishments rose 27 percent.

As it has been pointed out in prior issues of this publication, the full impact of this violent crime on the victim cannot be completely measured in terms of dollar loss alone. While the object of the attack is money or property, many victims of the mugger and the strong-arm robber, as well as the armed robber, suffer serious personal injury. During 1975, the average value loss in each robbery incident was $331 for a total loss of $154 million.

Robbery, Type of Weapon Used, 1975

[Percent distribution]

Region	Total	Armed			Strong-armed
		Firearms	Knife or other cutting instrument	Other weapon	
Northeastern States	100.0	32.7	20.4	11.4	35.5
North Central States	100.0	52.7	6.9	6.2	34.2
Southern States	100.0	53.4	8.2	5.3	33.1
Western States	100.0	44.4	11.5	6.5	37.6
Total	100.0	44.8	12.4	7.8	35.0

Clearances

In 1975, law enforcement agencies were successful in clearing 27 percent of the robbery offenses reported. Eighty-two percent of the robberies which were cleared by arrest involved adults. Of the strong-arm robberies cleared, 29 percent were by the arrest of persons under 18 years of age. In robberies where a knife was used, persons under the age of 18 were involved in 16 percent of the clearances, 11 percent in those in which a firearm was used, and 15 percent in which another dangerous weapon was used.

Persons Arrested

Nationally, arrests for robbery increased 7 percent in 1975 when compared to 1974. The greatest volume of arrests occurred in cities and increased 6 percent. In the rural areas, arrests increased 17 percent and in the suburban areas arrests increased 6 percent.

Examination of arrest data discloses that 77 percent of the persons arrested for robbery were under 25 years of age and 58 percent were under 21 years of age. Of all persons arrested for robbery, 34 percent were under the age of 18. This greater proportion of youthful arrests, compared to clearances is accounted for in part by the fact the young-age offenders frequently act in groups. Robbery arrests for this young-age group recorded an 11 percent increase in 1975 over 1974.

In 1975, 7 of every 100 persons arrested for robbery were females. Arrests of women for this offense rose 10 percent in 1975 when compared to 1974.

From a standpoint of race, 59 percent of those arrested were Negro, 39 percent were white, and all other races made up the remainder.

Persons Charged

In 1975, 58 percent of all adults arrested for robbery were prosecuted. Thirty-seven percent of the persons processed for this crime were juveniles whose cases were referred to juvenile court jurisdiction. Of the adults prosecuted in 1975, 55 percent were convicted of the substantive offense, 9 percent were convicted for lesser charges, and the remainder were acquitted or their cases were dismissed.

BURGLARY

The Uniform Crime Reporting Program defines burglary as the unlawful entry of a structure to commit a felony or theft. The use of force to gain entry is not required to classify the crime as

CHART 10

a burglary. The offense of burglary in this Program is broken down into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

Volume

An estimated total of 3,252,100 burglaries occurred during 1975. In 1974, the large core cities over 250,000 inhabitants recorded 32 percent of the total burglary figure. For calendar year 1975, this decreased to 31 percent. Of the Crime Index offenses, burglary makes up 29 percent of the total. When viewed as a segment of property crime, burglary is found to comprise 32 percent of the total. Geographically, the Southern States reported 31 percent of the total volume, the Western States 24 percent, the North Central States 23 percent, and the Northeastern States 22 percent.

Viewed monthly the highest volume of burglary occurred in January of 1975.

Trend

The five-year trend, 1970–1975, indicates burglary offenses have risen 47 percent. In 1975, burglary increased 7 percent over 1974. Cities over 250,000 population reported an increase of 4 percent. In 1974, these cities experienced an increase of 13 percent in volume. In 1975, the suburban and rural areas of the Nation reported increases of 7 percent each. Viewed regionally, the Northeastern States reported a 9 percent increase, the Southern and Western States each a 7 percent increase, and the North Central States a 5 percent increase.

Burglary Rate

The burglary rate in 1975 was 1,526 per 100,000 inhabitants. During the period of 1970–1975, this rate increased 41 percent. The burglary rate for 1975 increased 6 percent when compared with 1974. The metropolitan areas reported a rate of 1,748 burglaries per 100,000 people. The rural areas recorded a rate of 786 offenses per 100,000 inhabitants. The cities outside metropolitan areas had a rate of 1,103 burglaries per 100,000.

The Western States recorded the highest burglary rate in 1975 with 2,029 offenses per 100,000 inhabitants followed by the Southern States with a rate of 1,475, the Northeastern States 1,448, and the North Central States 1,322.

Nature of Burglary

Burglary is generally accepted as a crime of stealth and opportunity. It is committed by both amateurs and professionals. In 1975, 75 percent of the burglaries involved forcible entry, 18 percent were unlawful entry (without force) and the remainder were forcible entry attempts.

Nonresidential offenses accounted for 36 percent of total burglaries in 1975; residential burglaries accounted for 64 percent. Daytime burglaries of residences increased 9 percent in 1975 and accounted for over half of the residential burglaries. Considering the period 1970–1975, there has been an increase of 60 percent in the volume of daytime residential burglaries.

Prevention and detection of the burglary offense poses a most difficult problem to law enforcement. Volume alone is an overriding factor, particularly as related to the number of officers available for this type investigation. Viewed as a group, nighttime burglary represents 60 percent of all burglaries.

Economically, the offense of burglary represents a substantial sum. Victims suffered a loss of $1.4 billion in 1975 through the offense of burglary; this is an increase of about $184 million from the 1974 loss. During 1975, residential losses amounted to $925 million. In 1974, that loss amounted to $762 million. Nonresidential losses due to burglaries amounted to $446 million in 1975 and $425 million in 1974. In 1975, the average dollar loss per burglary was $422.

Clearances

As suggested earlier, burglary is a crime of stealth. This characteristic tends to make the detection of the perpetrator more difficult. In 1975, law enforcement was successful in clearing 18 percent of the total burglary offenses.

Adults were involved in 67 percent of all cases cleared while young persons under 18 years of age were involved in 33 percent. Law enforcement agencies in cities 250,000 and above cleared 17 percent of these crimes in 1975. In the suburban areas 17 percent were solved while 20 percent were cleared in the rural areas.

Persons Arrested

In this Program, the arrest of one person may account for the clearance of numerous offenses. Likewise, the arrest of several may clear only one offense. In the offense of burglary, it has been the experience of law enforcement that the arrest

of one person frequently clears several reported offenses. In 1975, total arrests for burglary increased by 7 percent. Arrests of persons under the age of 18 increased 6 percent while arrests of persons 18 years and over increased 9 percent. In the cities and suburban areas, increases of 7 and 10 percent respectively were reported. The rural areas experienced an 11 percent increase in total arrests for burglary.

In analyzing the 1970–1975 period, a 41 percent increase in burglary arrests is seen. Arrests of individuals under the age of 18 increased 43 percent, while the arrests of adult burglary offenders increased 40 percent.

Nationally, persons under 25 accounted for 85 percent of all arrests for burglary in 1975. Persons under 18 accounted for 53 percent of all arrests for this crime. Females were involved in five of every 100 arrests for burglary during 1975. Arrests of whites accounted for 70 percent of all burglary arrests in 1975. Twenty-eight percent of the persons arrested for burglary were Negroes.

Persons Charged

In 1975, 71 percent of the adults arrested for burglary were prosecuted. Of the adults prosecuted, 60 percent were found guilty as charged. Conviction for lesser offenses accounted for 11 percent and 29 percent were freed through acquittal or dismissal of charges. Juveniles referred to juvenile court jurisdiction accounted for 57 percent of all persons processed for burglary in 1975.

LARCENY-THEFT

Larceny-theft is the unlawful taking or stealing of property or articles without the use of force, violence, or fraud. It includes crime such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc. In the Uniform Crime Reporting Program this crime category does not include embezzlement, "con" games, forgery, and worthless checks. Motor vehicle theft, of course, is excluded from this category for crime reporting purposes inasmuch as it is a separate Crime Index offense.

Volume

In 1975, there were 5,977,700 offenses of larceny-theft, which is an increase from 5,262,500 such crimes in 1974. This offense makes up 53 percent of the Crime Index total. From a seasonal standpoint, the volume of larceny-theft was highest during the summer months of 1975.

Geographically, the volume of larceny-theft was highest in the Southern and North Central States which reported 29 and 28 percent respectively, followed by the Western States with 23 percent, and the Northeastern States with the remainder.

Trend

Larceny-theft increased 14 percent in 1975 when compared to the previous year. The large cities with over 250,000 inhabitants reported an increase of 13 percent in volume. The suburban and rural areas increased 12 and 10 percent, respectively. Nationwide, this offense has increased 41 percent since 1970.

Geographically, the Northeastern and North Central States each reported increases of 14 percent, while the Southern States had an increase of 18 percent and the Western States recorded an increase of 8 percent.

Larceny-theft Rate

During 1975, the larceny-theft crime rate was 2,805 offenses per 100,000 inhabitants, an increase of 13 percent from the 1974 rate. The rate has increased 35 percent since 1970. In 1975, the larceny-theft rate in the metropolitan areas was 3,196 per 100,000 inhabitants, 2,849 per 100,000 inhabitants in cities outside any metropolitan areas and 942 in the rural areas. Viewed geographically, the Western States reported the highest larceny-theft rate with 3,708 offenses per 100,000 inhabitants, which was a 6 percent increase over 1974. The North Central States had a rate of 2,911 up 14 percent; the Southern States 2,582 up 17 percent; and the Northeastern States with 2,296 reported an increase of 14 percent in the rate.

Nature of Larceny-theft

The average value of property stolen in each larceny-theft in 1975 was $166, up from $106 in 1970 and $74 in 1960. When the average value is applied to the estimated crimes in this category, the dollar loss to victims is $992 million. It is true that a portion of the goods stolen was recovered and returned to victims, but the relatively low percentage of these crimes cleared by arrest and the lack of specific identification characteristics on such property indicate these recoveries did not materially reduce the overall loss. In addition many offenses in this category, particularly where

the value of the stolen goods is small, never come to police attention.

In 1975, the average value of goods and property reported stolen from victims of pickpockets was $135, by purse-snatchers $83, by shoplifters $33, by thefts from motor vehicles $207, and by miscellaneous thefts from buildings $258.

From year to year, the distribution of larceny-theft as to type of theft remains relatively constant. As in prior years, a major portion of these thefts, 37 percent, represented thefts of motor vehicle parts and accessories and other thefts from motor vehicles. Other major types of thefts which contributed to the large number of these crimes were thefts from buildings with 17 percent and stolen bicycles with 13 percent. Miscellaneous types of larceny-thefts, not falling into any of the specific categories for which data were collected, made up 18 percent of the total. The remainder was distributed among pocket-picking, purse-snatching, shoplifting, and thefts from coin-operated machines. The accompanying table presents the distribution of larceny-theft by type within the geographic regions of the United States.

Larceny Analysis by Region, 1975

[Percent distribution]

	Northeastern States	North Central States	Southern States	Western States

Total	100.0	100.0	100.0	100.0

Clearances

The nature of larceny-theft, a crime of opportunity, sneak thievery, and petty unobserved thefts, makes it an extremely difficult offense for law enforcement officers to solve. A lack of witnesses and the tremendous volume of these crimes work in the offender's favor. In 1975, 20 percent of all larceny-theft offenses brought to police attention were solved. Involvement of the young age group is demonstrated by the fact that 35 percent of these crimes which were cleared in the Nation's cities were solved by arrest of persons under 18 years of age. Juvenile clearance figures for suburban areas and rural areas were 37 percent and 24 percent, respectively.

Persons Arrested

Fifty-one percent of the total arrests for Crime Index offenses in 1975 were for larceny-theft. Arrests for this crime increased 8 percent, 1975 over 1974. Forty-five percent of these arrests were of persons under 18 years of age, and when individuals under 21 were considered, the ratio rose to 63 percent. When examined by sex of arrested persons, it was determined that females comprised 31 percent of all arrests for larceny-theft and had a higher involvement in this offense than for any of the other Index offenses. In fact, women were arrested more often for larceny-theft than any other offense in 1975.

Arrests of females rose 10 percent in 1975; while arrests of males increased 7 percent. Arrests of whites outnumbered Negroes by more than 2 to 1 with all other races comprising about 2 percent of the arrests for larceny-theft. The total volume of arrests for larceny-theft in 1975 as compared with the 1970 figures indicates a 39 percent increase. Arrests of individuals under 18 were 25 percent greater than 1970. The number of adult arrests rose 55 percent over the number of arrests for this offense in 1970.

Persons Charged

As in prior years, law enforcement agencies nationally charged more offenders for larceny-theft than for any other Crime Index offense. Seventy-three percent of the adults prosecuted for larceny-theft were found guilty of this offense, 4 percent were found guilty of a lesser charge, and the remaining had their cases dismissed or were acquitted. Forty percent of persons processed in 1975 for larceny-theft were referred to juvenile court jurisdiction.

MOTOR VEHICLE THEFT

In Uniform Crime Reporting, motor vehicle theft is defined as the unlawful taking or stealing of a motor vehicle, including attempts. This definition excludes taking for temporary use by those persons having lawful access to the vehicle.

Volume

In 1975, 1,000,500 motor vehicles were reported stolen. Geographically, the volume of motor vehicle theft in 1975 was highest in the Northeastern

States which reported 32 percent of the total number followed by the North Central States with 25 percent. The Southern States reported 22 percent and the Western States reported the remainder. This crime made up 9 percent of the total Crime Index offense volume. Seasonal variations during 1975 disclosed that the volume of motor vehicle theft was highest during the month of October.

Trend

The number of motor vehicle thefts in 1975 increased 2 percent compared to 1974. The number of motor vehicle thefts has increased 8 percent since 1970.

Motor vehicle theft increased 2 percent in large cities with 250,000 or more inhabitants during 1975. The rural areas reported an increase of 6 percent in motor vehicle thefts while the suburban areas had an increase of 2 percent.

Geographically, motor vehicle thefts were up 8 percent in the Northeastern States. The North Central States reported an increase of 2 percent, whereas the Western and the Southern States each reported a decrease of 1 percent. The accompanying chart shows the trend in motor vehicle thefts, 1970–1975.

Motor Vehicle Theft Rate

The 1975 motor vehicle theft rate of 469 offenses per 100,000 inhabitants is 2 percent higher than in 1974. Since 1970, the motor vehicle theft rate has risen 3 percent. People in cities with over one million population were deprived more often of their motor vehicles in 1975 than in any other population group with 1,138 thefts per 100,000 inhabitants.

Nationally, the motor vehicle theft rate in the metropolitan areas was 586 per 100,000 inhabitants. The cities outside metropolitan areas had a motor vehicle theft rate of 216, and the rural areas had a rate of 102.

Regionally, the Northeastern States had the highest motor vehicle theft rate in 1975. This rate was 653, an increase of 8 percent from 1974. The Western States had a rate of 539 per 100,000 inhabitants which was a decrease of 3 percent. The North Central States had a rate of 431 which was 2 percent higher than the prior year and the Southern States reported a decrease of 2 percent in the motor vehicle theft rate to 330 per 100,000 inhabitants.

Across the Nation in 1975, one of every 130 registered motor vehicles was stolen. Regionally, this rate was the highest in the Northeastern States where 13 motor vehicles per 1,000 registered vehicles were stolen. In the other three regions the figures were 8 in the Western States, 7 in the North Central States, and 5 in the Southern States.

Nature of Motor Vehicle Theft

Motor vehicle theft rates again clearly indicate that this crime is primarily a large city problem since the highest rates appear in the most heavily populated sections of the Nation. In 1975, the average value of stolen motor vehicles was $1,457 at the time of theft.

Of all motor vehicle thefts during 1975, 84 percent were automobiles. Seven percent were trucks or buses and 9 percent were other types of motor vehicles.

Motor Vehicle Theft, 1975

[Percent distribution]

Region	Total	Autos	Trucks and buses	Other vehicles
Northeastern States	100.0	92.5	2.3	5.2
North Central States	100.0	84.2	5.8	10.0
Southern States	100.0	76.1	10.8	13.1
Western States	100.0	77.0	10.4	12.6
Total	100.0	84.0	7.0	9.0

Clearances

Law enforcement agencies were successful in solving 14 percent of the motor vehicle thefts by arrest of the offender.

In the Nation's largest cities, 11 percent of motor vehicle thefts were cleared during 1975. Throughout the Nation, motor vehicle theft clearance percentages ranged from 26 percent in the South Atlantic States to 7 percent in the New England States.

In all geographic divisions and population groups, the participation of the young-age group population is indicated by the high proportion of these clearances which were through the arrest of persons under 18 years of age. In the largest cities, 29 percent of the motor vehicle thefts cleared were cleared by arrests in this age group while juveniles accounted for 32 percent of the solutions in the suburbs and 28 percent in the rural areas.

Persons Arrested

As in prior years, persons arrested for motor vehicle theft come primarily from the young age

group population. In 1975, 55 percent of all persons arrested for this crime were under 18 years of age. When persons under 21 are included in the computations, the proportion of arrests rises to 73 percent.

The national trend in motor vehicle theft arrests disclosed a decrease of 5 percent in 1975 when compared to 1974. Adult arrests decreased 2 percent while arrests of persons under 18 decreased 7 percent. During the period 1970–1975 motor vehicle theft arrests decreased 14 percent.

Females under 18 years of age recorded an increase of 2 percent in arrests for motor vehicle theft from 1974. White persons made up 71 percent of the arrests for motor vehicle theft, Negroes 26 percent, and all other races accounted for the remainder.

Persons Charged

Police reports disclosed that of all persons formally processed for motor vehicle theft in 1975, 63 percent were referred to juvenile court jurisdiction. No other Crime Index offense results in such a high percentage of juvenile referrals. When the remaining adult offenders were considered as a group, 53 percent of those prosecuted on charges of motor vehicle theft were found guilty as charged, 9 percent were convicted of lesser charges, and 38 percent were acquitted or their cases were dismissed.

CLEARANCES

Law enforcement agencies clear a crime when they have identified the offender, have sufficient evidence to charge him and actually take him into custody. Crime solutions are also recorded in exceptional instances when some element beyond police control precludes the placing of formal charges against the offender, such as the victim's refusal to prosecute after the offender is identified or local prosecution is declined because the subject is being prosecuted elsewhere for a crime committed in another jurisdiction. The arrest of one person can clear several crimes or several persons may be arrested in the process of clearing one crime.

The nationwide clearance information as reported by law enforcement agencies shows that 21 percent of the Index crimes were cleared during 1975. In 1975 law enforcement agencies cleared 78 percent of the murder offenses, 51 percent of forcible rapes, 64 percent of aggravated assaults, and 27 percent of the robberies. Solutions in the property crime categories showed police cleared 18 percent of the burglaries in 1975, 20 percent of the larceny-thefts, and 14 percent of the motor vehicle thefts. Police are able to clear a higher percentage of the crimes against the person, not only because of the more intense investigative effort afforded these violent crimes requiring police attention, but more importantly, because witnesses are usually available who can identify the perpetrators.

The highest overall Crime Index clearance rate regionally was recorded by the Southern States with 24 percent, followed by the Western and North Central States, each with 21 percent, and the Northeastern States with 18 percent.

Offenses Cleared by Arrest of Juveniles

One means of measuring the involvement of the young-age group in crime is to identify the number of crimes in which they are the offenders. In 1975, 30 percent of all Crime Index offenses solved involved only persons under 18 years of age, while persons 10 to 17 years of age account for about 16 percent of the total United States population.

PERSONS ARRESTED

In 1975, law enforcement agencies made an estimated 9.3 million arrests nationally for all criminal acts except traffic offenses. The arrest rate was 45 arrests for each 1,000 persons. The arrest rate for big cities as a group was 53 per 1,000 inhabitants, for suburban areas 37, and in the rural areas the arrest rate was 32.

Arrests are primarily a measure of police activity. Arrest practices, policies, and enforcement emphasis will vary from place to place and within a community from time to time. The volume of police arrests for certain unlawful conduct such as drunkenness, disorderly conduct, and certain local ordinances is particularly influenced by the above. On the other hand, robbery, burglary, and other arrests for serious crimes are more likely the result of standard procedures. Arrests are first a measure of police activity as it relates to crime. Arrests do, however, provide a useful index to indicate involvement in criminal acts by the age, sex, and race of the perpetrators, particularly for those crimes which have a high solution rate. Procedures used in this Program require that an arrest be counted on each separate occasion when a person is taken into custody, notified, or cited. Annual arrest figures do not measure the number of individuals taken into custody since one person may be arrested several times during the year for

the same or different offenses. As noted above, this tends to happen frequently for certain types of offenses against public order such as drunkenness, vagrancy, disorderly conduct, and related violations.

Arrest Trends

In 1975, police arrests for all offenses except traffic increased 2 percent over 1974. During this time, arrests of persons under 18 years of age increased 2 percent and arrests of persons 18 years of age and over increased 3 percent. When only Crime Index offenses are used to compute this trend, there is a 6 percent increase for all ages.

During the five-year period, 1970–1975, police arrests for all offenses except traffic increased 4 percent, with the arrests of persons under 18 years of age up 13 percent and the arrests of persons 18 years of age and over up 1 percent. When only the Crime Index offenses are used in computing the five-year trend, the increase is 35 percent. Arrests of persons under 18 years of age increased 27 percent while the adult arrests increased 42 percent. Violent crime arrests for persons under 18 years of age increased 54 percent while the property crime arrests increased 24 percent.

Arrests for Narcotic Drug Law violations, 1975 over 1974, decreased 6 percent nationally. From 1970 to 1975, arrests for this violation increased 31 percent. There is set forth a tabulation by geographic region showing the type of narcotic drug involved in the arrest of the offender during 1975.

Arrests for Narcotic Drug Law Violations

[Percent distribution]

Region	Total	Heroin or cocaine	Marijuana	Synthetic narcotics	Other
Northeastern States	100.0	19.9	69.7	4.1	6.3
North Central States	100.0	13.2	70.6	4.5	11.7
Southern States	100.0	10.4	75.7	3.5	10.4
Western States	100.0	12.2	62.5	6.1	19.2
Total	100.0	13.1	69.2	4.7	13.0

Age

Nationally, persons under 15 years of age made up 9 percent of the total police arrests; under 18, 26 percent; under 21, 42 percent; and under 25, 57 percent. In the suburban areas, the involvement of the young age groups in police arrests is markedly higher than the national figures, with the under 15 age group represented in 11 percent; under 18, 31 percent; under 21, 48 percent; and under 25, 63 percent. In the rural areas the distributions were lower for the younger age groups, with the under 15 group being involved in 4 percent; under 18 in 16 percent; under 21 in 33 percent; and those under 25 in 50 percent of total police arrests. When only the Index crimes are considered, 17 percent of all persons arrested in 1975 were under the age of 15 and 43 percent were under 18 years of age.

Sex

Male arrests outnumbered female arrests by 5 to 1 in 1975. Male arrests in 1975 rose by 2 percent while female arrests were up 4 percent. Twenty percent of the arrests for Crime Index offenses were of female persons. Ten percent of the arrests for violent crimes in 1975 involved females and arrests of females for these types of crimes increased 5 percent over 1974. Again, as in prior years, their involvement was primarily for larceny which accounted for 24 percent of all female arrests. Females accounted for 31 percent of the embezzlement and 14 percent of the narcotics arrests. Over one-half of the runaway—police custody cases—were females under 18 years of age.

Arrests of both males and females under 18 years of age increased 13 percent from 1970 to 1975. When the serious crimes as a group are considered, arrests of males, 1970–1975, were up 30 percent and female arrests increased 56 percent.

Arrest Rates

The following table sets forth arrest rates by geographic regions for Crime Index offenses. Arrest rates indicate law enforcement activity in response to crime.

Arrests by Region, 1975

[Rate per 100,000 inhabitants]

Offense	U.S. Total	Northeastern States	North Central States	Southern States	Western States
Murder	9.2	6.9	6.9	13.1	9.2

Motor vehicle theft	67.1	63.1	49.9	56.8	112.2
Crime Index total	1,059.6	898.0	898.6	1,135.0	1,365.2

PERSONS CHARGED

Disposition data reveals the results of cases in which law enforcement agencies have made an

arrest and subsequently formally charged the offender in a court of jurisdiction. This information is important to the law enforcement administrator in evaluating the quality of investigations and court presentation functions.

In 1975, 80 percent of the adults arrested for Crime Index offenses were prosecuted in the courts. Of the adults prosecuted for Crime Index offenses, 66 percent were found guilty as charged and 7 percent of a lesser charge.

It must be recognized that not all arrested persons are turned over to the courts for prosecution. There are various reasons for this: failure of the victim to cooperate or appear for the prosecution, persons arrested are released with a warning, evidence is obtained which discloses the arrested person did not commit the offense, or there is not sufficient evidence available to support either a formal charge or a subsequent prosecution.

For example, nearly one-half of the juveniles arrested are handled by the individual law enforcement agencies without preferring a formal charge or referring them directly to juvenile authorities. All contributors to this Program are urged to obtain and report final disposition in cases involving persons they arrest. Tables containing this data commence on page 174. Keep in mind that police methods of handling juvenile offenders differ widely from place to place. Also, the tables concerning juveniles (local age limit) refer to those who were arrested and turned over to juvenile authorities in connection with specific criminal acts.

Forty-three percent of the persons processed for Crime Index offenses were young persons referred to juvenile court jurisdiction. Similar to prior years, juvenile referrals for motor vehicle theft were significant. Sixty-three percent of those processed for motor vehicle theft were juveniles. Juvenile referrals for burglary were 57 percent, larceny-theft 40 percent, robbery 37 percent, forcible rape 21 percent, aggravated assault 18 percent, and murder 9 percent.

During 1975, as in past years, motor vehicle theft, arson, burglary, and vandalism recorded high percentages of juvenile referrals. When all crime categories are reviewed, it is noted that convictions on original charges remained high in the offenses against public order and decency—driving under the influence, drunkenness, disorderly conduct, and vagrancy. As in prior years, offenses against trust, such as fraud and embezzlement, also recorded a high percentage of conviction on original charges.

Of the adults who were prosecuted for Crime Index offenses, 28 percent were acquitted or their cases were dismissed. In 1975, 32 percent of the murder defendants were either acquitted or their cases dismissed at some prosecutive stage. Forty-six percent of those charged with forcible rape were acquitted or had their cases dismissed, and 41 percent of the persons charged with aggravated assault were released either through acquittal or dismissal.

Seventy-three percent of those persons prosecuted for the offense of larceny-theft were found guilty of that offense in 1975. This was followed by burglary with 60 percent found guilty of the original charge, 55 percent for robbery, 54 percent for murder, 53 percent for motor vehicle theft, 47 percent for aggravated assault, and 42 percent for forcible rape.

The offense which had the highest percentage guilty of a lesser charge was murder where 14 percent of the defendants were convicted on some charge other than murder.

CAREERS IN CRIME

In January, 1970, the FBI began converting offender records to computer form for the operational Computerized Criminal History File of the National Crime Information Center. Although this is an operational program, it was designed and established with full recognition of the statistical and research potential of offender based data.

A summary of 255,936 offenders in the Computerized Criminal History file who were arrested during the period 1970–1975 is set out in the following tables. Of these 255,936 individuals, 164,295 (64 percent) had been arrested two or more times. These individuals had an average criminal career of five years and three months (number of years between first and last arrest) during which time they were arrested an average of four times each. The 255,936 offenders had a total of 1,011,000 documented charges during their criminal careers, with 355,308 reported convictions and 141,922 imprisonments of six months or more.

Of the 164,295 repeat offenders, 82,190 or 50 percent were rearrested in states other than that where first arrested. Of the 82,190 "mobile" offenders, 16,908 were arrested in a total of three different states and 12,336 were arrested in four or more different states.

Profile of Offenders Arrested, 1970–1975

Four or more States	7.4	3.2	9.1	6.2	3.2	1.7	7.3	10.8

Due to rounding percentages may not add to 100.0.

It should be kept in mind that this presentation is conservative and understates the amount of crime committed by these offenders since it is based on police detection, arrest, and submission of a fingerprint card. As indicated in earlier pages of this publication, law enforcement agencies do not clear or solve most crimes. Only one-fifth of the serious crimes committed during 1975 were solved by arrest. It is also true that the prior conviction and imprisonment rates are slightly lower than actual because criminal justice agencies do not always submit such data after arrest, conviction, and release. In fact, disposition data has not been received on over 435,000 of the 1,011,000 charges.

A profile of criminal repeating for selected offenders is shown in the above table. Average age for the first arrest is high because of the general practice not to submit criminal fingerprint cards on juveniles. Criminal career is the average years between the first and last arrest.

The offender profile is classified by type of crime for which last arrested during the 1970's.

When criminal repeating is viewed by type of crime for which last arrested in the 1970's re-

Percent Repeaters by Race and Sex
Persons Arrested 1970–1975

Sex	Total	Race		
		White	Negro	Other
Total:				
Number of persons arrested	255,936	149,324	102,132	4,480

peaters ranged from 27 percent for the embezzler to 79 percent for the auto thieves.

Follow-up

A follow-up study of 78,143 offenders in the CCH File who were released during 1972 is presented here. This study follows for any arrest in which a fingerprint card was submitted through 1975. The charts which follow show the percentage of persons rearrested after release for a particular type of crime and type of release.

When criminal repeating is checked by type of crime from which released in 1972, rearrest ranged from 28 percent for the embezzler to 81 percent for the burglars. Largest repeater rates in the same crime were for the narcotic offenders with 31 percent being rearrested for the same crime and gambling law violators with 23 percent being rearrested on a gambling violation within four years. Of the 3,855 offenders being released in 1972, from weapons violations, 12 percent were rearrested for a violent crime within four years. Sixty-eight of these offenders were rearrested for a murder. Three hundred fifty-five were arrested for a weapons violation and 337 were rearrested for a narcotics violation.

Seventy-four percent of the offenders released after serving their prison time were rearrested within four years. Of those persons released on parole, 71 percent repeated and 57 percent of those placed on probation repeated. Of those persons acquitted or who had their cases dismissed in 1972, 67 percent were rearrested for new offenses within four years.

CRIME INDEX TABULATIONS

In this section, tabulations are shown to indicate the probable extent, fluctuation, and distribution of crime for the United States as a whole; geographic divisions; individual states; standard metropolitan statistical areas; and cities, towns, and counties. The measure used is a Crime Index consisting of seven important offenses which are counted as they become known to the law enforcement agencies. Crime classifications used in the Index are: murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary-breaking or entering, larceny-theft, and motor vehicle theft.

The total number of criminal acts that occur is unknown, but those that are reported to law enforcement provide the first means of a count. Not all crimes come readily to the attention of law enforcement; not all crimes are of sufficient importance to be significant in an index; and not all important crimes occur with enough regularity to be meaningful in an index. With these considerations in mind, the above crimes were selected as a group to furnish an abbreviated and convenient measure of the crime problem.

It is important to remember in reviewing the tables in this section that the volume of crime in any area is subject to the factors set forth on page v. Estimates of current permanent population are used to construct crime rates. With our highly mobile population all communities, metropolitan areas, and states are affected to a greater or lesser degree by the element of transient population. This factor is not accounted for in crime rates since no reliable estimates by state are available nationwide.

Crime trend and rate tables group places according to population size. Law enforcement's performance in clearing crimes by arrest is presented by population group and geographic division.

National averages are also shown indicating the type and value of the property stolen, by offense and type, and value of the property stolen, by offense and type, and value recovered by police investigation. Robbery, burglary, and larceny-theft are examined by type, as well as where and when they occurred. Dispositions made of persons formally charged for all criminal offenses are also set forth.

Statistical data relating to suburban areas are provided for the use of law enforcement officials in suburban communities in making limited comparisons. Places used to establish totals for suburban areas include cities with less than 50,000 population together with county law enforcement agencies in standard metropolitan statistical areas. Of course, the crime experience of the large core city is excluded.

It is important to remember in studying averages that usually about half the units used must be above and about half below. National averages can provide the law enforcement administrator with valuable guidance in analyzing the local crime count, as well as the performance of his force in combating crime. The analysis, however, does not end with such a comparison, for it is only through an appraisal of local conditions that a clear picture of the community crime problem or the effectiveness of the law enforcement operation is possible.

[1] Population is Bureau of the Census provisional estimate as of July 1, 1975.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft and motor vehicle theft.

[3] The percentage representing area actually reporting will not coincide with the ratio between reported and estimated crime totals, since these data represent the sum of the calculations for individual states which have varying populations, portions reporting and crime rates.

[1] Population is Bureau of Census provisional estimates as of July 1, except April 1, 1960 and 1970, census.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Percent change and crime rates calculated prior to rounding number of offenses. Revised estimates and rates based on changes in reporting practices.

Table 3.—*Index of Crime by Regions,*

[Number and rate per 100,000

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

[3] Additional reporting occurred in 1975 due to State Uniform Crime Programs being activated or due to revised figures being submitted for agencies previously reported. Accordingly, figures are not comparable to data published in prior issues. See table 3 for adjusted figures.

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault. Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

Table 6.—*Number of Offenses Known to the Police, 1975, Cities and Towns 10,000 and Over in Population*

Individual cities are listed in this table alphabetically by state. Population of each city is designated by group: 1-over 250,000; 2-100,000 to 250,000; 3-50,000 to 100,000; 4-25,000 to 50,000. 5-10,000 to 25,000.

City by State	Population group	Total Crime Index	Criminal homicide		Forcible rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—theft	Motor vehicle theft
			Murder and nonnegligent manslaughter	Manslaughter by negligence

[1] 1975 figures not comparable with prior years, and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses, or annexation, are removed from trend tables.

[1] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.
[2] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.
[3] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities are also included in other city groups.
[4] Includes state police agencies with no county breakdown.

Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

Table 15.—*Crime Rates, Offenses Known to the Police, 1975, for Suburban and Nonsuburban Cities by Population Groups*

[1975 estimated population. Rate: Number of crimes per 100,000 inhabitants]

Population group	Crime Index total	Violent crime [1]	Property crime [2]	Criminal homicide		Forcible rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—theft	Motor vehicle theft
				Murder and nonnegligent manslaughter	Manslaughter by negligence

Miscellaneous	901,800,000	113,400,000	14

[1] All totals and percentages calculated before rounding.

Arrest Tabulations

Tables in the following section provide certain personal characteristics of individuals arrested for all criminal acts. Arrest rates and trends are shown for city, suburban, and rural areas, as well as the United States as a whole. Tabulations are published containing characteristics of persons arrested by age, sex, and race.

Arrest statistics are collected monthly from contributing law enforcement agencies. In using these arrest figures, it is important to remember that the same person may be arrested several times during one year for the same type or for different offenses. Each arrest is counted. Further, the arrest of one person may solve several crimes and in other instances two or more persons may be arrested during the solution of one crime.

Arrests are primarily a measure of law enforcement activity as it relates to crime. Although arrest practices vary, particularly with respect to juveniles, contributors to this Program are instructed to count one arrest each time an individual is taken into custody for committing a specific crime. A juvenile is counted as a person arrested when he commits an offense and the circumstances are such that if the offender were an adult, an arrest would be made.

Arrest data, while primarily a measure of law enforcement activity, is also a gauge of criminality when used within its limitations as must be done with all forms of criminal statistics including court and penal.

Table 28.—*Total Estimated Arrests,[1] United States, 1975*

Total [2]	9,273,600	Weapons; carrying, possessing, etc.	166,400
		Prostitution and commercialized vice	68,200
Criminal homicide:		Sex offenses (except forcible rape and prostitution)	64,400
Murder and nonnegligent manslaughter	20,180	Narcotic drug laws	601,400
Manslaughter by negligence	3,720		
Forcible rape	26,670	Opium or cocaine and their derivatives	78,800
Robbery	158,870	Marijuana	416,100
Aggravated assault	245,600	Synthetic or manufactured narcotics	28,300
Burglary—breaking or entering	553,900	Other—dangerous narcotic drugs	78,200
Larceny—theft	1,139,100	Gambling	62,600
Motor vehicle theft	150,800		
		Bookmaking	5,500
Violent crime [3]	451,310	Numbers and lottery	10,400
Property crime [3]	1,843,800	All other gambling	46,800
		Offenses against family and children	68,900
Subtotal for above offenses [2]	2,298,900	Driving under the influence	947,100
		Liquor laws	340,100
Other assaults	422,700	Drunkenness	1,217,000
Arson	18,600	Disorderly conduct	748,400
Forgery and counterfeiting	67,100	Vagrancy	40,000
Fraud	171,300	All other offenses (except traffic)	1,209,200
Embezzlement	12,200	Suspicion (not included in total)	36,200
Stolen property; buying, receiving, possessing	122,000	Curfew and loitering law violations	146,400
Vandalism	230,700	Runaways	250,100

[1] Arrest totals based on all reporting agencies and estimates for unreported areas.
[2] Because of rounding, items may not add to totals.

[1] Includes suburban city and county police agencies within metropolitan areas. Excludes core cities. Suburban cities also included in other city groups. Population figures rounded to the nearest thousand. All rates were calculated on the population before rounding.

[2] Violent crime is offenses of murder, forcible rape, robbery, and aggravated assault.

[3] Property crime is offenses of burglary, larceny-theft, and motor vehicle theft.

Table 30.—*Total Arrest Trends, 1960–75*

[2,726 agencies; 1975 estimated population 96,429,000 [1]]

[1] In suburban agencies male arrests under 18 increased 4 percent and female arrests under 18 increased 6 percent. In rural agencies male arrests under 18 increased 2.7 percent and female arrests under 18 increased 10.7 percent.

[2] Violent crime is offenses of murder, forcible rape, robbery and aggravated assault.

[3] Property crime is offenses of burglary, larceny—theft and motor vehicle theft.

Section 3

Law Enforcement Employee Data

All information concerning law enforcement employees, including officers killed and assaulted, is found in this section. Employment data is arranged in tables showing the number of employees for various population groups and the number of employees per 1,000 inhabitants. Additionally, civilian employees and sworn officers are grouped by sex, and the shift and patrol assignments of sworn officers are tabulated, as well. Information concerning law enforcement officers killed and assaulted is similarly presented in tables giving relevant data as to the victim officers, their assailants, the weapons used, and the circumstances of the crime.

Employee Rates

Full-time law enforcement officers as of October 31, 1975, numbered more than 411,000 nationwide for a rate of 2.1 per 1,000 inhabitants. Considering full-time law enforcement employees, including civilians, there were more than 504,000 employees representing a rate nationally of 2.6 per 1,000 inhabitants.

Caution should be exercised in using rates for comparative purposes since there is a wide variation in the responsibilities of various law enforcement agencies throughout the country. Just as the conditions which affect the amount and type of crime that occurs vary from place to place, so do the requirements for types of police service based upon the conditions which exist in a given community. For example, the increased need for police service in a community which has a highly mobile or seasonal population, differs from a community which has a relatively stable or fixed population. In addition, a small community situated between two large cities may require a greater number of law enforcement personnel than a similarly sized community having no urban centers nearby. The crime conditions of the former are for the most part dictated by its geographic location.

The functions of sheriffs also vary widely in different sections of the country. In certain areas the sheriffs' responsibilities are limited almost exclusively to civil functions and/or the administration of the county jail facilities. The sheriffs' departments used in computing rates, however, are all engaged in law enforcement activity and are responsible for all phases of policing in their jurisdiction.

While the ratio of law enforcement personnel to population nationally remains unchanged from the previous year, it is significant to note that many cities in the United States continue to operate with substantially fewer law enforcement employees per capita than the national average. For example, cities in the ten to fifty-thousand population range average 1.9 law enforcement employees per 1,000 inhabitants, unchanged from the year before. This low average rate for smaller cities is offset by the fact that large cities, those over 250,000 population, were substantially above the national average with a rate of 3.6 law enforcement employees per 1,000 inhabitants, an increase over the year before.

Suburban areas remained unchanged from the previous year with an average of 2.1 full-time law enforcement employees per 1,000 inhabitants. Sheriff departments likewise maintained their average rate of 1.6 full-time employees from the prior year.

The West North Central and West South Central Divisions of the country recorded the fewest (2.1) law enforcement employees per 1,000 population while the Middle Atlantic and South Atlantic states continued as the Nation's leaders in the rate of law enforcement employees to population. Although the Middle Atlantic states dropped a tenth of a point to 2.9 from their rate the year before, the South Atlantic states rose during the year by the same amount, a tenth of a point, to 3.1 employees.

POLICE EMPLOYEE DATA

AVERAGE NUMBER OF POLICE DEPARTMENT EMPLOYEES, AND RANGE IN NUMBER OF EMPLOYEES, PER 1,000 INHABITANTS

BY POPULATION GROUPS, OCTOBER 31, 1975

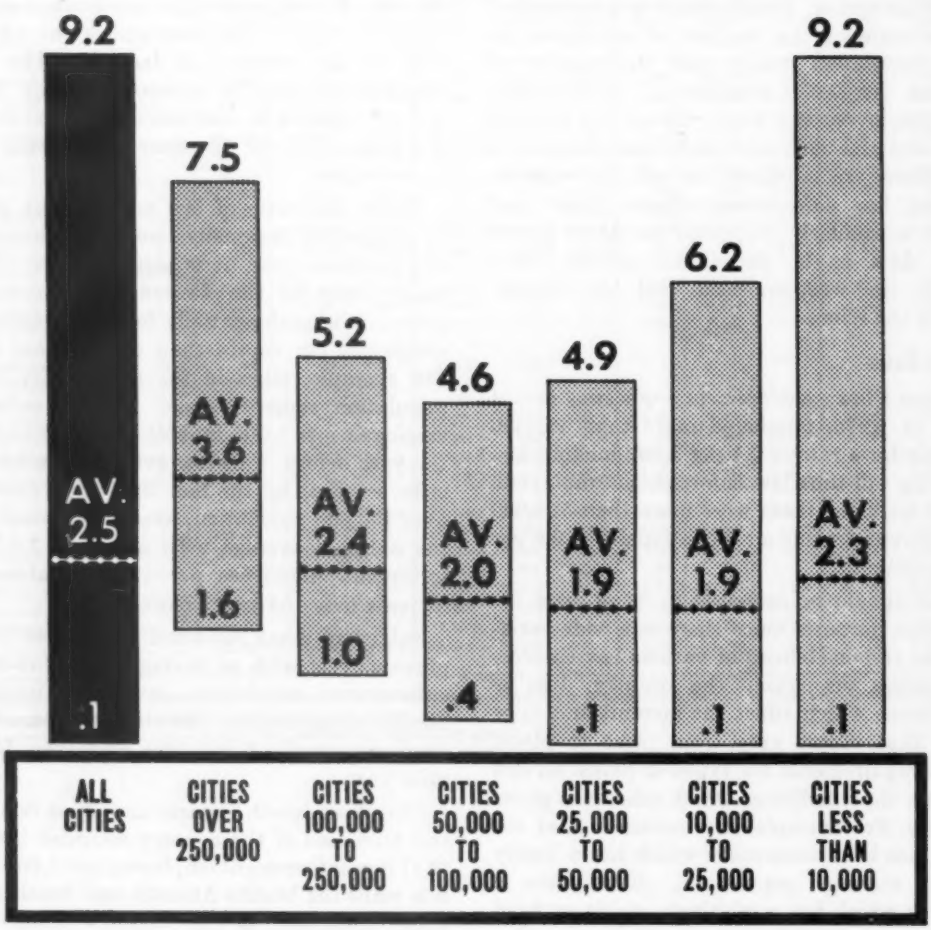

CHART 20

It is pointed out that the figures set forth in detailed police employee tables represent national averages. They should be used as a guide or indicator and not considered as recommended or desirable police strengths. Adequate manpower for a specific place can only be determined after a careful study and analysis of the various factors which contribute to the requirement for police service in that community.

Civilian Employees

The percentage of law enforcement personnel which was civilian (See Table 65) rose in nearly every population group. On the average during 1975, 16.6 percent of all city law enforcement personnel were civilian employees; up from 15.3 percent in 1974. The rising proportion of civilian employees in law enforcement agencies is recognition of the fact that they can be used effectively to free sworn officers for more imperative police duties.

Sworn Personnel

Law enforcement employee rates based on sworn personnel only (excluding civilian employees) show that the average for all cities was 2.1 per 1,000 inhabitants in 1975. The city rates, nationally, range from 0.1 to 7.8 per 1,000 inhabitants. In city agencies, males represented 98 percent of all sworn personnel, while males in suburban agencies constituted 96 percent and in county sheriff and police departments 92 percent. The average rate of sworn employees in sheriff's departments was 1.3 per 1,000 inhabitants and the rate range for the 2,609 reporting county agencies was 0.1 to 12.0 per 1,000 inhabitants.

Police Patrols

In 1975, 90 percent of the police patrol assignments utilized in cities were vehicle patrols, and 10 percent were foot patrols. In cities with over 250,000 inhabitants 83 percent were vehicle patrols and 17 percent were foot patrols. In the areas covered by sheriffs and county police departments, nearly all were covered by vehicle patrols. For all reporting cities, patrol distribution was about evenly divided between the day and evening hours, with reduced patrol activity during the night. In the areas covered by sheriffs and county police, 43 percent of the patrol activity was during the day, 31 percent during the evening hours, and 26 percent after midnight.

The distribution of vehicle patrol assignments between one and two officers for all cities indicated that 88 percent of the patrols during the day involved one-officer cars, 77 percent during the evening hours, and after midnight 76 percent. In the large cities with 250,000 or more inhabitants, 69 percent of the daytime patrols involved the use of one-officer cars, 59 percent during the evening hours, and after midnight 54 percent. In the areas covered by sheriffs and county police departments, 93 percent of the daytime patrols involved the use of one-officer cars, 83 percent during the evening hours, and after midnight 80 percent were one-officer vehicles.

LAW ENFORCEMENT OFFICERS KILLED

In 1975, 129 local, county, state, and Federal law enforcement officers were killed due to felonious criminal action in the United States, Puerto Rico, Guam, and the U.S. Virgin Islands. During the ten-year period 1966–1975, 1,023 officers were killed. The number of law enforcement officers killed in Puerto Rico for the period 1971–1975 and the number of Federal officers killed in the period 1972–1975 have been included in the tabulations with the local, county, and state officers for the ten-year period.

Year:	*Number of Victim Officers*
1966	57
1967	76
1968	64
1969	86
1970	100
1971	129
1972	116
1973	134
1974	132
1975	129

Geographic Locations

In 1975, 54 officers were slain in the Southern States, 25 in the North Central States, 23 in the Western States, and 19 in the Northeastern States. The following chart shows the number of law enforcement officers killed by region for each of the two five-year periods, 1966–1970 and 1971–1975. An accompanying table shows the officers feloniously killed in 1975 by geographic division and population grouping.

One hundred and seventeen of the 129 officers slain during 1975 were from 104 different local,

county, and state law enforcement agencies in 32 states. Six officers were killed in Puerto Rico and four Federal officers were also killed. Among the agencies, the New York City, New York, Police Department ranked highest with six officers slain in 1975. The Philadelphia, Pennsylvania, Police Department followed with three Officers slain.

Among the states, California and Texas ranked highest with eleven officers killed in each state. The states of New York and Tennessee followed with eight and six officers slain in each state respectively.

Circumstances Surrounding Deaths

There were more law enforcement officers killed attempting arrests than in any other circumstance in 1975. This trend was established in prior years and continues as one of the most dangerous situations the police officer faces today. Thirty-three officers were killed while attempting arrests for crimes other than robbery or burglary. In connection with robbery offenses, 25 officers were slain by persons encountered during the commission of a robbery or during the pursuit of robbery suspects. Eight officers were killed at the scene of burglaries or while pursuing burglary suspects.

In 1975, ten officers were killed in ambush situations. Seven of these officers were victims of unprovoked attacks which did not involve any apparent element of entrapment. The other three officers were slain in premeditated attacks.

Twenty officers were slain in 1975 responding to a disturbance call. Included in disturbance calls are family quarrels, man with gun, bar fights, etc. Fourteen officers were slain while making traffic stops, twelve officers were killed while investigating suspicious persons or circumstances, five were killed while handling mentally deranged persons, and two officers were killed while transporting or otherwise engaged in custody of prisoners.

SITUATIONS IN WHICH LAW ENFORCEMENT OFFICERS WERE KILLED 1966-1975

Eighty-nine patrol officers were slain in 1975. Eighty-eight of these officers were assigned to patrol vehicles and one was on foot patrol. Twenty-two officers were detectives or officers on special assignments. In the highest tradition of the law enforcement profession, 18 officers, while in an off-duty status, were taking appropriate police action relative to criminal matters when they were slain. Nine of the off-duty officers were killed by persons they encountered during the commission of a robbery or while in pursuit of robbery suspects. During the period 1966–1975, 67 percent (683) of the 1,023 officers slain were assigned to patrol duties.

In 1975, 51 of the on-duty officers were alone and unassisted when killed. During the period 1966–1975, 35 percent (or 357) of the officers were alone and unassisted when they gave their lives for the communities they were sworn to protect.

Weapons Used

One hundred and twenty-seven, or 98 percent, of the law enforcement officers killed in 1975 were slain with firearms. Handguns were used in 93 of these deaths, rifles in 21, and shotguns were used to kill 13 of the officers. Nineteen officers were slain with their own firearms. The two officers not slain with firearms were killed through the use of automobiles.

Fifty-nine of the officers killed in 1975 utilized their service firearms while in contact with their assailants. Forty of these officers discharged their service firearms while attempting to protect themselves. Forty-nine percent (or 62) of the officers killed by firearms were within five feet of their assailants at the time they were shot.

Law Enforcement Officers Killed, 1966–1975

[By type of weapon]

Type of weapons	1966–1975		1966–1970		1971–1975

Total	1,023	100.0	383	100.0	640	100.0

Due to rounding, the percentages do not add to totals.

Day and Hour of Attack

As the accompanying data shows, it cannot be said any one day or time is extremely more hazardous to a law enforcement officer than any other day or time. The data points out the fact an officer must be constantly alert.

The following table shows the number of law enforcement officers killed by day of week for the period 1966–1975.

Day of week:	*Number of Victim Officers*
Monday	154
Tuesday	118
Wednesday	133
Thursday	145
Friday	167
Saturday	155
Sunday	151

Profile of Victim Officers

Ninety percent of the officers slain during 1975 were white, nine percent were Negro, and one percent were of other races. The median year of service was five. Eleven percent of the officers killed had one year or less of law enforcement service. Forty-eight percent had less than five years of service, 28 percent had five through ten years of service, and 24 percent had more than ten years service as law enforcement officers.

Profile of Victim Officers

Law enforcement officers	1966–75	1966–70	1971–75
Percent white	88	85	89
Percent Negro	11	14	11
Percent other race	1	1	----
Median years of service	5	6	5
Percent with 1 year or less service	13	15	12
Percent with less than 5 years service	46	43	48
Percent with 5 through 10 years of service	28	29	28
Percent over 10 years of service	26	28	24

Persons Identified

Law enforcement agencies cleared 121 of the 129 killings that occurred in calendar year 1975. One hundred and seventy-two persons were identified in connection with these crimes. Fifty-nine percent of the persons identified were white, 40 percent Negro, and one percent other races. Seventy percent of the persons had prior arrests, and 52 percent of the individuals had been convicted. Twenty-eight percent had prior arrests for violent types of crime such as murder, rape, armed robbery, aggravated assault, etc. Forty-five percent of those who had previously been convicted on criminal charges were granted parole or probation. Sixteen percent of the persons identified were on parole or probation when an officer was killed. Nineteen percent of the individuals had a prior arrest for a narcotics charge, and three percent had prior arrests for police assault. Ninety-eight percent were male and two percent female.

In 1975, 24 subjects were justifiably killed at the scene of the police killing or soon thereafter. Four of these offenders were killed by victim officers. Sixteen offenders were wounded by victim officers. Six offenders committed suicide.

The persons identified ranged in age from 15 to 63. The median age of these individuals was 24 years. Fifty-six percent were between the ages of 20 and 30. Seven percent (or 12) were under the age of 18.

In the period 1964–1973, which is the most recent ten-year period for which complete data is available, 1,239 known persons were involved in connection with the killing of 872 law enforcement officers. One thousand and thirty-eight of these individuals were arrested and charged in connection with the killings of the officers. Available court disposition data regarding the offense related to the officers' deaths disclose that 78 offenders were sentenced to death, 331 were sentenced to life imprisonment, 214 received prison terms ranging from one to 2,001 years, five offenders received probation, one offender received a suspended sentence, and the sentences for six offenders were unknown.

ASSAULTS ON LAW ENFORCEMENT OFFICERS

The following information is based on a detailed monthly collection of data in the Uniform Crime Reporting Program regarding the problem of assaults on local, county, and state law enforcement officers in the Nation. The large number of reported assaults on sworn officers is in part due to a prevalent attitude of disrespect for law enforcement in certain elements of our society.

The uniformed officer is the target of persons with real or imagined grievances against the "system." He also is, in many instances, the first person to render aid to mentally deranged individuals, to calm disturbances and quarrels, to offer protection to those threatened, or to rescue those in peril. The officer is the active representative of a society whose members too often forget their individual responsibilities to their fellow human beings. In this role, he suffers a variety of unsolicited and undeserved abuse.

During 1975, 44,867 assaults on police were reported by 7,435 agencies covering an estimated population of 151,927,000. The rate of assaults on law enforcement officers for the Nation was 15 assaults per 100 officers for the year.

Activity of Law Enforcement Officers at the Time of Assault

An examination of the activities of law enforcement officers at the time of the assaults (Table 69) discloses that the greatest number of assaults, 28 percent, were in responding to disturbance calls. The second highest incidence activity, 22 percent of the assaults, was attempting arrests other than burglary or robbery. In disturbance calls involving personal, family, and business disputes, the responding officer frequently becomes the target for all the antagonists. The high incidence of assaults in these common circumstances should serve as a warning for greater alertness on the part of all patrol personnel. The officer must avoid becoming complacent in his pursuit of any type of law enforcement activity. The police administrator or command officer should consider procedures to afford the responding officer the fullest possible support in all activities no matter how menial or routine they might seem.

Weapons Used in Assaults on Law Enforcement Officers

The distribution of weapons used to assault officers is shown by geographic division, population group, and type of activity in Tables 67 and 68. Nationwide, personal weapons such as hands, fists, feet, etc., were used in 80 percent of the assaults on officers in 1975. Firearms were used in 7 percent of the assaults, knives or cutting instruments in 3 percent, and other weapons in 10 percent of the assaults on law enforcement officers.

Type of Assignment

Table 72 shows the type of assignment of the officer assaulted. Forty percent were in two-officer vehicles, 39 percent were in one-officer vehicles, 6 percent were on detective or special assignment, and 14 percent were on other assignments. In the highest assault incidence category, responding to disturbance calls, the number of victim officers assigned to two-officer vehicles exceeded those assigned alone to patrol vehicles; 2 percent were on detective or special assignment; and 7 percent were on other assignments. Of all assaults on police, the vehicle patrol officer was the victim in 79 percent of the cases.

Injuries to Law Enforcement Officers

Assaults on officers resulted in nearly 19,000 cases of personal injury. The rates (Table 66) showed assault with injury to 9 officers per 100 in the New England division as contrasted with 3 per 100 in the East South Central division. The national rate of injuries to law enforcement officers was 7 per 100 officers. Cities over 100,000 inhabitants had the greatest rate of assault with injury with 9 per 100 and sheriffs and county police departments had the lowest rate with 3 per 100.

Time of Assault

Assaults on officers by time and population group are set forth in Table 70. Approximately one-half of the assaults on officers occurred during the hours from 8:00 p.m. to 2:00 a.m. The period with greatest incidence was from 10:00 p.m. to midnight. More than 18 percent of the assaults were recorded for this two-hour period.

Clearances in Assaults on Law Enforcement Officers

Nationwide in 1975, 92 percent of law enforcement assaults were cleared by arrest. In cities of 50,000 to 100,000, this clearance percentage was highest of any population group with nearly 96 percent being cleared. Assaults in disturbance matters were cleared at the rate of 97.5 percent in these cities.

By activity, the highest clearance rate for all agencies was the 95 percent recorded in assaults on officers by mentally deranged persons. Ambush attacks accounted for the lowest clearance rate with 57 percent. Table 73 shows the percentage of assaults cleared by type of activity and population group.
